Sheriff's Sale of Lands

UNDER AND BY VIRTUE OF a writ of execution, issued out of The Supreme Court of Ontario, an action wherein James Reginald Kee was the plaintiff and assigned same to Raymar Investments and Tares Bobiak and Maxie Bobiak were the defendants, to me directed, against the goods and chattels, lands and tenements of the said defendants, I have seized and taken in execution all the right, title, interest and equity of redemption of the said defendant, Maxie Bobiak, in and to:

All and Singular that certain parcel or tract of land and premises, situate, lying and being in the Township of Saltfleet and being composed of Lot Number Fifty-two (52) according to a plan of the subdivision of parts of Lots Numbers Thirty-three (33) and Thirty-four (34) in the Second Concession of the Township of Saltfleet known as Normanhurst, and duly registered in the Registry Office for the County of Wentworth as Number 534.

On the premises is said to be erected a dwelling consisting of four rooms and a bathroom, with a small office in front of Angel stone and insulbrick siding, with a workshop in rear.

Municipally known as 1658 Barton Street East, Hamilton, Ontario.

All of which said right, title, interest and equity of redemption of the said Maxie Bobiak in the said lands and tenements I shall offer for sale by public auction in my office in the Court House, 50 Main Street East, in the City of Hamilton, on Monday, the 24th day of February, 1969, at 11.00 o'clock in the forenoon. Terms Cash.

Dated at Hamilton this 6th day of January, 1969.

JOHN E. BETZNER,
Sheriff, County of Wentworth.

THE CORPORATION OF THE CITY OF HAMILTON

NOTICE IS HEREBY GIVEN that The Corporation of the City of Hamilton will apply to the Legislative Assembly of the Province of Ontario at its next session, for special legislation: To authorize The Corporation of the City of Hamilton to use certain lands in the block bounded by Merrick Street, James Street, Market Square and MacNab Street in the City of Hamilton, and occupied by a market, for any use or purpose compatible with the development of the Civic Square presently under construction pursuant to an Urban Renewal program for this part of the City, completely free from any market use. The land in the above block had originally been conveyed to the City between 1837 and 1856 by various owners with the understanding that the lands be used for market purposes. The City of Hamilton Act, 1959, c. 116, s. 1, was passed to enable the construction of an overhead parking garage, provided that the land be still used for market purposes if so required by the understanding with the original owners as set out in the various documents transferring ownership to the City.

Dated at Hamilton, Saturday, the 18th day of January, 1969.

TAKE NOTICE that the Council of the Corporation of the Town of Thorold has applied to His Honour Harold E. Fuller, Judge of the County Court of the County of Welland for approval of By-law No. 2835, being a by-law changing the names of certain parts of streets in the Town of Thorold, as follows:

Present Name	Location	New Name
1. Ann St.	Within the limits of Broderick Ave.	Broderick Ave.
2. Ann St.	Within the limits of Pardale Dr.	Parkdale Dr.
3. Ann St.	Within the limits of St. Charles Ave.	St. Charles Ave.
4. Cleveland St.	Within the limits of Towpath St. established by By-law 2727	Towpath St.
5. Clairmont St.	West of Front St., within the limits of Sullivan Ave.	Sullivan Ave.

The purpose of the changes above is to give effect to prevailing custom by giving the said streets the names by which they are commonly known, instead of the legal names assigned to them on Corporation Plan 11. A copy of the proposed by-law and plans showing the changes may be seen at the office of the Town Clerk.

AND TAKE NOTICE that His Honour has appointed Wednesday, the 26th day of March, 1969, at 10 a.m. in his Chambers at the Court House, Welland, Ontario, as the time and place at which he will consider the by-law. Anyone desiring to advocate or oppose the changes described above should attend at the aforementioned time and place.

Dated this 15th day of January, 1969.

C. H. ORT,
Clerk, Town of Thorold
Municipal Building,
14 Ormond Street North,
Thorold, Ontario.

Schedule—Common Labourers
Construction Industry—Windsor
Zone.

Made—November 6th, 1968.

Approved—December 23rd, 1968.

Filed—January 15th, 1969.

ORDER MADE UNDER THE INDUSTRIAL STANDARDS ACT

1. Sections 2, 3, 4, 5 and 7 of the Schedule to Regulation 335 of Revised Regulations of Ontario, 1960 are revoked and the following substituted therefor:

2. The regular working periods for the industry are,

- (a) a regular working week consisting of not more than 42½ hours of work performed during the regular working days; and
- (b) a regular working day consisting of not more than 8½ hours of work performed on Monday, Tuesday, Wednesday, Thursday or Friday, between 7.30 a.m. and 4.30 p.m. with one-half hour for noon recess.

3.—(1) Night work is work performed other than,

(a) on a holiday; or

(b) during a regular working day,

and consisting of not more than 8½ hours of work in a period of twenty-four hours.

(2) Where work cannot be performed during a regular working day it may be performed by night work.

4. The minimum rate of wages for work performed during a regular working day and for night work is \$3.77 an hour.

5.—(1) Where work is performed in two or more regular shifts and an employee,

(a) works not more than 8½ hours in a period of twenty-four hours; and

(b) is not employed elsewhere while engaged in shift work,

the employee shall be deemed to be employed during a regular working day for the purposes of this Schedule.

(2) One of the shifts that begin in a period of twenty-four hours is a day shift and the rest are night shifts.

(3) An employee who works on a night shift is entitled, as a minimum, to wages for 8½ hours for work of 7½ hours.

.

7.—(1) No work shall be performed in the industry on a holiday except,

(a) in cases of extreme necessity where life or property is jeopardized; or

(b) on repairs to buildings where the work is necessary to prevent the loss of employment to persons who are regularly employed in the buildings being repaired.

(2) All work performed under subsection 1 shall be performed only if the advisory committee has issued a permit therefor.

(3) Subject to this Schedule, the advisory committee is authorized to issue the permits at its discretion.

2. Section 8 of the Schedule to Regulation 335 of Revised Regulations of Ontario, 1960 is revoked.

3. Sections 9 and 10 of the Schedule to Regulation 335 of Revised Regulations of Ontario, 1960 are revoked and the following substituted therefor:

9. The rate of wages for overtime work is \$7.54 an hour.

10. The advisory committee is authorized to fix a minimum rate of wages lower than the rate fixed by this Schedule for a person who is handicapped.

4. The Schedule to Regulation 335 of Revised Regulations of Ontario, 1960 is amended by adding thereto the following section:

VACATIONS

11.—(1) In this section, "period of entitlement" means the period from the 1st day of July in any year to the 30th day of June in the year next following.

(2) Where an employee has not ceased to be employed by his employer, the employee is entitled to be paid by the employer on the 30th day of June in each year, as vacation with pay, an amount equal to 4 per cent of the employee's gross earnings during his period of entitlement.

- (3) Where an employee has ceased to be employed by his employer, the employee is entitled to be paid by the employer, within ten days of the cessation of employment, as vacation with pay, an amount equal to 4 per cent of the employee's period of entitlement that he was in the employ of the employer.

THE FARM PRODUCTS MARKETING ACT

O. Reg. 17/69.

Apples—Marketing.

Made—January 14th, 1969.

Filed—January 22nd, 1969.

REGULATION MADE UNDER THE FARM PRODUCTS MARKETING ACT

APPLES — MARKETING

1. In this Regulation,

- (a) "apples" means apples of every variety produced in Ontario;
- (b) "buyer" means a person who buys apples from a producer;
- (c) "Commission" means The Ontario Apple Marketing Commission;
- (d) "plan" means The Ontario Apple Marketing Plan;
- (e) "processing" means baking, canning, dehydrating, drying, freezing, slicing or processing with sugar or any chemical including, but not limited to, sulphur dioxide, and includes producing juice from apples;
- (f) "processor" means a person engaged in the processing of apples;
- (g) "producer" means a producer of apples in Ontario;
- (h) "retailer" means any person who offers for sale or sells apples directly to a consumer.

2. This Regulation provides for the control and regulation in any and all respects of the marketing within Ontario of apples, including the prohibition of such marketing in whole or in part, except as hereinafter provided.

3. The Board exempts from this Regulation apples produced,

- (a) in the territorial districts of Ontario; and
- (b) in the Provisional County of Haliburton.

LICENCES

4.—(1) No person shall commence or continue to engage in the producing of apples except under the authority of a licence as a producer in Form 1.

(2) Every producer shall be deemed to be the holder of a licence in Form 1 while not in default of payment of licence fees required to be paid to the Commission.

5.—(1) No person shall commence or continue to engage in the processing of apples except under the authority of a licence as a processor in Form 3.

(2) No licence in Form 3 shall be issued except upon application therefor in Form 2.

(3) A licence in Form 3 expires with the 15th day of July next following the date on which the licence is issued.

(4) A licence in Form 3 shall be issued without charge.

6.—(1) The Board may refuse to grant a licence as a processor where the applicant is not qualified by experience, financial responsibility and equipment to engage in properly the business of a processor or for any other reason that the Board deems proper.

(2) The Board may suspend or revoke or refuse to renew a licence as a processor for failure to observe, perform or carry out the provisions of the Act, the regulations, the plan or any order or direction of the Board or Commission.

POWERS OF COMMISSION

7. The Board delegates to the Commission the power,

- (a) to require persons engaged in producing or marketing apples to register their names, addresses and occupations with the Commission;
- (b) to require persons engaged in producing or marketing apples to furnish such information relating to the production or marketing of apples as the Commission determines;
- (c) to appoint persons to inspect the books, records, lands and premises and any apples of persons engaged in the marketing of apples;
- (d) to stimulate, increase and improve the marketing of apples by such means as it deems proper;
- (e) to co-operate with a marketing board, a local board or a marketing agency of any other province for the purpose of marketing apples;
- (f) to do such acts and make such orders and issue such directions as are necessary to enforce the due observance and carrying out of the provisions of the Act, the regulations and the plan.

8. Subject to sections 4, 5 and 6, the Board delegates to the Commission its power to make regulations with respect to apples,

- (a) providing for the licensing of any or all persons before commencing or continuing to engage in the marketing of apples;
- (b) prohibiting persons from engaging in the marketing of apples except under the authority of a licence issued by the Commission;

(c) providing for the suspension or revocation of, or the refusal to renew, a licence for failure to observe, perform or carry out the provisions of the Act, the regulations, the plan or any order or direction of the Board or Commission;

(d) providing for the fixing of licence fees,

(i) not exceeding eight cents for each 100 pounds or fraction thereof of apples marketed for processing,

(ii) notwithstanding sub-clause i, not exceeding two cents for each 100 pounds or fraction thereof of apples marketed for the production of juice, and

(iii) not exceeding ten cents for each 100 pounds or fraction thereof of apples marketed for any purpose other than processing,

payable yearly, half-yearly, quarterly or monthly at different amounts or in instalments from producers;

(e) providing for the fixing of licence fees payable yearly, half-yearly, quarterly or monthly at different amounts or in instalments from any or all persons marketing apples;

(f) providing for the collection of licence fees from any or all persons producing or marketing apples and the recovering of such licence fees by suit in a court of competent jurisdiction;

(g) requiring any person who receives apples to deduct from the moneys payable for the apples any licence fees payable to the Commission by the person from whom he receives the apples and to forward such licence fees to the Commission;

(h) prescribing the form of licences;

(i) requiring any person who produces and processes apples to furnish to the Commission statements of the amounts of apples that he produced in any year and used for processing;

(j) providing for the exemption from any or all of the regulations, orders or directions under the plan of any class, variety, grade or size of apples, or any person or class of persons engaged in the producing or marketing of apples or any class, variety, grade or size of apples;

(k) requiring the furnishing of security or proof of financial responsibility by any person engaged in the marketing of apples and providing for the administration and disposition of any moneys or securities so furnished;

(l) providing for the control and regulation of the marketing of apples including the times and places at which apples may be marketed;

(m) providing for the control and regulation of agreements entered into by producers of apples with persons engaged in marketing or processing apples and the prohibition of any provision or clause in such agreements;

(n) requiring any person who produces apples to offer to sell and to sell apples through the Commission;

(o) providing for the making of agreements relating to the marketing of apples by or through the Commission and prescribing the forms and terms and conditions of such agreements.

9.—(1) The Board authorizes the Commission to use any class of licence fees and other moneys payable to it for the purposes of paying the expenses of the Commission, carrying out and enforcing the Act and the regulations and carrying out the purposes of the plan.

(2) The Board authorizes the Commission to establish a fund in connection with the plan for the payment of any moneys that may be required for the purposes mentioned in subsection 1.

MARKETING BY COMMISSION

10.—(1) All apples shall be marketed by or through the Commission.

(2) No person shall market apples except by or through the Commission.

11. The Board vests in the Commission the following powers:

1. To direct and control, by order or direction, either as principal or agent, the marketing of apples, including the times and places at which apples may be marketed.

2. To determine the quantity of each class, variety, grade and size of apples that shall be marketed by each producer.

3. To prohibit the marketing of any class, variety, grade or size of apples.

4. To purchase or otherwise acquire such quantity or quantities of apples as the Commission deems advisable.

12. The Board vests in the Commission the following powers:

1. To determine from time to time the price or prices that shall be paid for apples, or any class, variety, grade or size of apples, to persons engaged in the producing, marketing or processing of apples and to determine different prices for different parts of Ontario.

2. To require the price or prices payable or owing to any person for apples to be paid to or through the Commission.

3. To collect from any person by suit in a court of competent jurisdiction the price or prices or any part thereof of apples owing to any person engaged in the producing, marketing or processing thereof.

2. Subsection 2 of section 12 of Ontario Regulation 102/67 is amended by striking out "or" at the end of clause *a*, by adding "or" at the end of clause *b*, and by adding thereto the following clause:

- (c) a student at a school for the deaf or a school for the blind continued or established under section 15 of *The Department of Education Act*.

3. Section 15 of Ontario Regulation 102/67 is revoked and the following substituted therefor:

- 15.—(1) The board of review shall be composed of not more than ten members.

- (2) Where,

- (a) the chairman of the board of review is absent or unable to act, a vice-chairman designated by the chairman; or

- (b) the office of the chairman of the board of review is vacant, a vice-chairman designated by the Minister,

has and shall exercise the jurisdiction and power of the chairman, including the power to complete any unfinished matter.

- (3) Subject to subsection 4, a request for a hearing and review shall be made by an applicant or recipient in duplicate in Form 6 within thirty days of the decision, order or directive to be reviewed.
- (4) The period of limitation in subsection 3 does not apply to a request for hearing and review of any decision, order or directive made by the Director on or after the 28th day of March, 1968, but before this section, as re-made, came into force.
- (5) Copies of Form 6 may be obtained from the Director by any applicant or recipient on request therefor.
- (6) The Director at the request of the chairman shall send to the board of review a written report pertaining to the decision, order or directive to be reviewed.
- (7) Within fourteen days following receipt of a notice in Form 6 the chairman of the board of review shall send to the Director a copy of the notice and a copy of the notice of the time and place of the hearing.
- (8) Service of the notice of the time and place of the hearing and review shall be sent by registered mail to the applicant or recipient at the address shown on the notice respecting the hearing and review.

- (9) Subject to subsection 6 of section 15*a*, the board of review may adjourn the hearing from time to time after giving to the parties reasonable notice of the adjournment and of the time and place of the new hearing.

- (10) An applicant or recipient may at any time before the hearing withdraw his request for the hearing and review by notifying the chairman of the board of review in writing.

15*a*.—(1) The chairman may authorize one member of the board of review to conduct the hearing and to report to the board and such member has all the powers of the board for the purpose of such hearing.

- (2) The report of such member may be adopted as the decision of the board of review by two or more other members of the board, or may be otherwise dealt with as the board deems proper.
- (3) If, after receiving due notice, the applicant or recipient requesting the review does not attend the hearing, the board of review may proceed in his absence and he shall not be entitled to further notice of any future proceedings by the board.

- (4) All hearings of the board of review shall be held *in camera*.

- (5) The Director or his representative shall be given an opportunity at the hearing to give reasons for the decision, order or directive being reviewed.

- (6) The board of review shall reach a decision according to the evidence within a period not exceeding forty days from the date that the notice in Form 6 was received by the chairman of the board.

- (7) The notice of decision of the board of review shall include,

- (a) the principal findings of fact on the evidence officially noticed; and

- (b) the conclusions based on the findings of fact.

15*b*. A decision of the Director made pursuant to the direction of the board of review or the Court of Appeal shall take effect from the date of his original decision, order or directive, as the case may be, that was the subject of the review or appeal.

4. Ontario Regulation 102/67, as amended by Ontario Regulations 279/67 and 63/68, is further amended by adding thereto the following Form:

Applications to Parliament

NOTICE IS HEREBY GIVEN that The Corporation of the City of Hamilton will apply to the Legislative Assembly of the Province of Ontario at its next session, for special legislation:

1. To authorize The Corporation of the City of Hamilton to pass a by-law in order to pay out of its general funds for private drain connections whose construction the owners of the abutting lands have not requested, but whose construction The Corporation of The City of Hamilton deems necessary consequent upon the construction by The Corporation of the City of Hamilton of separate storm water sewers and separate sanitary sewers in replacement, construction or reconstruction of any combined storm water and sanitary sewer.

2. To authorize The City of Hamilton to cancel real property taxes payable by City Chevrolet Oldsmobile Limited during the time, from December 30, 1966 to August 31, 1967, that the company occupied a parcel of land 130' x 32', as tenant of the City. The company had gratuitously donated the land to the City in 1966 for park purposes on condition that it be occupied by the company at a rent of \$1 per year so long as the land was not immediately required for park purposes.

Dated at Hamilton, Saturday, the 4th day of January, 1969.

E. A. SIMPSON,
City Clerk.

ONTARIO MUNICIPAL BOARD

IN THE MATTER OF SECTION 28 of The Department of Municipal Affairs Act, R.S.O. 1960, c. 98; and

IN THE MATTER OF an application by The Board of Trustees of the Roman Catholic Separate School for the Improvement District of Sioux Narrows in the Territorial District of Kenora for an order making the said Board subject to the provisions of Part III of the said Act.

BEFORE:

J. A. KENNEDY, Q.C.,
Chairman.

— and —

J. V. LUDGATE,
Member.

Thursday, the 2nd
day of January,
1969

UPON THE APPLICATION of the Department of Municipal Affairs, and it appearing that by Ontario Regulation 333/68 the separate school zone for the Improvement District of Sioux Narrows is united with certain other separate school zones to form a district combined separate school zone known as The Kenora District Roman Catholic Separate School Board, and that consequently the circumstances no longer warrant or require supervision and control of the affairs of the said separate school board, and upon reading the material filed;

THE BOARD ORDERS, under and in pursuance of the powers contained in the legislation hereinbefore referred to, and all other powers vested in the Board, that on and after the 2nd day of January, 1969, the Department of Municipal Affairs shall cease to exercise jurisdiction and control over The Board of Trus-

tees of the Roman Catholic Separate School for the Improvement District of Sioux Narrows in the Territorial District of Kenora or its successor under the said legislation.

AND THE BOARD ORDERS that The Kenora District Roman Catholic Separate School Board shall on or before the 31st day of January, 1969, cause a copy of this order to be published in THE ONTARIO GAZETTE and in one issue of a newspaper having general circulation in the separate school zone.

(3) The first vice-president shall be chairman of the executive committee.

10. Section 36 of Regulation 496 of Revised Regulations of Ontario, 1960 is revoked and the following substituted therefor:

36. Subject to section 35, the standing committees shall be constituted as follows:

1. The executive committee, of one member of the council from each branch.
2. The legislation committee, of two members of the council and any other members of the Association who are appointed by the council.

3. The practice and ethics committee, of two members of council, and at least three other members of the Association appointed by the council so that each branch of the Association is represented.
4. The professional development committee, of two members of the council, and at least three other members of the Association appointed by the council.
5. Employee-members committee, of two members of the council, and one member of each group of employee members established under section 41.
6. The consulting practice committee, of one member of the council and at least four other members of the Association, appointed by the council.
7. The communications committee, of one member of the council, and at least four other members of the Association appointed by the council.

11.—(1) Clause *c* of section 37 of Regulation 496 of Revised Regulations of Ontario, 1960 is revoked.

(2) The said section 37 is amended by striking out "and" at the end of clause *e* and by adding thereto the following clauses:

- (g) make periodic reviews, projections, plans and recommendations to the council concerning the future organization and operation of the Association;
- (h) advise the council on matters pertaining to the Canadian Council of Professional Engineers; and
- (i) advise the council on all matters financial, including without limitation, investments, budgets, capital requirements, income, expenditures, salaries, reserves and contingencies and extraordinary expenses, both for current and future operations.

12. Sections 39, 40, 42 and 43 of Regulation 496 of Revised Regulations of Ontario, 1960 are revoked and the following substituted therefor:

39. The practice and ethics committee shall,

- (a) advise the council on all matters referred to it in connection with the practice and ethics of the profession;
- (b) provide for the informal investigation of all complaints referred to it in connection with the practice and ethics of the profession or of any matter which it considers likely to affect the ethical practice of the profession;
- (c) provide to the council or to members advice and assistance with respect to any of the following matters:
 1. Alleged breaches of the Code of Ethics.
 2. Interpretation of the Code of Ethics.
 3. Disputes or misunderstandings in connection with engineering work between members or between a member and a person, firm or corporation; and

- (d) authorize the issuing to members of the Association of letters of warning, advice or admonition in connection with the actions or practices of such members, with the objective of forestalling or preventing any actions or practices which might lead to the lodging of a formal complaint.

40. The professional development committee shall,

- (a) advise the council on the technical and professional development of professional engineers, and, as directed by the council, co-ordinate the activities of individuals, committees or chapters within the profession in matters concerning the raising of personal professional standards;
- (b) keep under review any business, social or political changes which may be relevant to the professional development of the professional engineer;
- (c) maintain a continuing study of the requirements of the profession and recommend programs for continuing technical, business and professional education;
- (d) co-ordinate the activities of the Association in and maintain a continuing study of all areas of continuing education, including liaison with engineering schools, with a view to improving the opportunities and facilities for continuing education;
- (e) develop and maintain communications with engineering students; and
- (f) make recommendations to the council on any programs arising out of any of the studies carried out by or under the guidance of the committee.

.

42. The consulting practice committee shall,

- (a) advise the council on and recommend to it policies and programs in relation to all matters pertaining to consulting engineering including, without limitation,
 - (i) professional practice,
 - (ii) ethics,
 - (iii) legislation,
 - (iv) fee schedules,
 - (v) forms of agreements,
 - (vi) publicity and public relations,
 - (vii) settlement of disputes, and
 - (viii) performance standards; and
- (b) act as a communications link between individual consulting engineers and the council and provide a forum for the interchange of information between consulting engineers.

43. The communications committee shall,

- (a) promote effective communication between the council and the individual members of the Association and between the Association and the public; and
- (b) advise the council on and, with its approval, initiate and carry out appropriate communications projects for achieving the foregoing.

13.—(1) Clause *d* of section 2 of the Schedule to Regulation 496 of Revised Regulations of Ontario, 1960 is amended by inserting after "provisions" in the first line "within the scope of his authority" and by adding at the end thereof "and shall at all times take all reasonable action to correct or report any situations which he feels may endanger the safety or welfare of the public".

(2) The said section 2 is amended by striking out "and" at the end of clause *d*, by adding "and" at the end of clause *e* and by adding thereto the following clause:

(f) regard his duty to the public welfare as paramount.

14. Clauses *a* and *c* of section 3 of the Schedule to Regulation 496 of Revised Regulations of Ontario, 1960 are revoked and the following substituted therefor:

(a) act in professional engineering matters for each employer as a faithful agent or trustee, regard as confidential any information obtained by him as to the business affairs, technical methods or processes of an employer and avoid or fully disclose the nature and extent of any conflicting interests which might influence his actions or judgment;

.

(c) have no interest, direct or indirect, in any materials, supplies or equipment used by his employer or in any persons or firms receiving contracts from his employer unless he fully discloses to his employer in advance the nature and extent of such interest;

15. Section 4 of the Schedule to Regulation 496 of Revised Regulations of Ontario, 1960 is amended by striking out "and" at the end of clause *d*, and by adding thereto the following clauses:

(f) ensure that the credit for engineering work is given to the professional engineers responsible for such work;

(g) uphold the principle of adequate compensation for professional engineers;

(h) provide opportunities for the professional development and advancement of his engineering associates and subordinates; and

(i) extend the effectiveness of the profession through the exchange of engineering information and experience.

16. Form 1 of Regulation 496 of Revised Regulations of Ontario, 1960 is revoked.

COUNCIL:

O. Reg. 26/69.

Apples—Transfer of Assets of Local Board.

Made—January 23rd, 1969.

Filed—January 28th, 1969.

REGULATION MADE UNDER THE FARM PRODUCTS MARKETING ACT

1. The Ontario Apple Producers' Marketing Board is dissolved upon the revocation of Ontario Regulations 276/65, 11/66, 214/67 and 262/67.

2. The terms and conditions for the dissolving of The Ontario Apple Producers' Marketing Board are as follows:

1. The assets of The Ontario Apple Producers' Marketing Board shall be transferred to and vested in The Ontario Apple Marketing Commission constituted by section 4 of the Schedule to Ontario Regulation 424/68.
2. The Ontario Apple Marketing Commission shall assume responsibility for the payment of all debts and liabilities and the carrying out of all obligations of the Ontario Apple Producers' Marketing Board incurred on or before the date on which this Regulation comes into force, up to but not exceeding the amount of the assets transferred to and vested in The Ontario Apple Marketing Commission under paragraph 1.
3. The secretary of each of the local boards mentioned in paragraphs 1 and 2 shall, prior to the dissolution of The Ontario Apple Producers' Marketing Board, file with the Board a statement certifying compliance with the terms and conditions mentioned in paragraphs 1 and 2.

3. The Ontario Apple Marketing Commission shall apply the assets transferred to and vested in it under paragraph 1 of section 2 to,

- (a) any payments required under paragraph 2 of section 2; and
- (b) the purposes of The Ontario Apple Marketing Plan.

THE PUBLIC HEALTH ACT

O. Reg. 29/69.

X-Ray Safety.

Made—January 7th, 1969.

Approved—January 23rd, 1969.

Filed—January 30th, 1969.

REGULATION MADE UNDER THE PUBLIC HEALTH ACT

X-RAY SAFETY

1. In this Regulation,

- (a) "dose" means the quantity of energy absorbed per unit of mass by any material from X-rays, or from secondary particles generated by X-rays, falling upon or penetrating the material, and "dose-rate" means dose per unit of time;
- (b) "dosemeter" means any device that, in the opinion of the Minister, may be reliably used for measuring or estimating dose or dose-rate;
- (c) "inspector" means an inspector appointed for the purpose of this Regulation and includes the chief inspector and a medical inspector;
- (d) "medical inspector" means a duly qualified medical practitioner appointed for the purpose of this Regulation;
- (e) "owner of an X-ray machine or owner of an X-ray source" means, respectively, a person in possession of an X-ray machine or a person in possession of an X-ray source, who has discretionary authority over its use;
- (f) "permanent X-ray location" means an enclosure, room or localized space within the bounds of which the owner of an X-ray machine confines or intends to confine its use;
- (g) "rad" means a unit of dose, and is realized when 100 ergs of energy have been absorbed per gram of matter, and "millirad" means a submultiple of a unit of dose equal to 0.001 rad;
- (h) "rem" means a unit of dose equivalent, defined and used in the Atomic Energy Control Regulations of Canada in relation to nuclear radiations, and applicable as a unit of X-ray dose on the basis that one rem equals one rad;
- (i) "shield" or "shielding" means a material barrier interposed in the path of a flow of X-rays and having the effect of reducing the dose or dose-rate experienced by any object located beyond the shield;
- (j) "X-rays" means artificially produced electromagnetic radiation of wave length shorter than twenty-five one thousand millionths of a centimetre;
- (k) "X-ray machine" means an electrically powered device, the principal purpose and function of which is the production of X-rays;
- (l) "X-ray source" means any device, or that portion of it, which emits X-rays, whether or not the principal purpose and function of the device is the production of X-rays;
- (m) "X-ray worker" means any person whose occupation,
 - (i) as owner of an X-ray source,

- (ii) as employee of an owner of an X-ray source,
- (iii) as a person providing professional or trade services under contract to an owner of an X-ray source, or
- (iv) as a student undergoing a course of instruction provided by the owner of an X-ray source,

requires him to use or operate an X-ray source or to enter regularly a space in which an X-ray source is being operated.

2.—(1) The Minister may appoint one or more inspectors, one of whom shall be designated chief inspector, and may appoint one or more medical inspectors, for the purpose of this Regulation.

(2) Every inspector shall be furnished with a certificate of his appointment under the hand and seal of the Minister and, on applying for admission to any premises, he shall, upon demand, produce the certificate.

3. This Regulation does not apply to the owner of an X-ray source,

- (a) that in every mode of operation produces a dose-rate of less than 0.1 millirad per hour in the body, or in any portion of the body, of any person regardless of his location with respect to the source;
- (b) that contains, as a component essential to the operation of the device of which it is part, a quantity of a radioactive material that is licensable under the *Atomic Energy Control Act* (Canada) and the regulations thereunder; or
- (c) that, in some mode of operation, produces X-rays or other radiation capable of inducing radioactivity in matter on which they fall.

4.—(1) Every person who,

- (a) is the owner of an X-ray machine when this Regulation comes into force; or
- (b) becomes the owner of an X-ray machine after this Regulation comes into force,

shall register with the Department within ninety days after this Regulation comes into force or he becomes the owner of an X-ray machine, as the case may be.

(2) An application for registration shall be in Form 1.

(3) The owner of an X-ray source that is not an X-ray machine shall register with the Department if so required by the Department.

(4) When a person who is registered as the owner of an X-ray machine or X-ray source under this section ceases to be the owner of any machine or source, he shall notify the Department within thirty days thereafter.

5.—(1) No owner of an X-ray source shall employ as an X-ray worker any person,

- (a) who is under eighteen years of age, except in the circumstances described in subsection 2;
- (b) who is known by him to be pregnant, unless he limits the dose receivable by such person in accordance with that specified in Part 1 of Appendix A, for X-ray workers, Category 2; or

- (c) who has been found by a medical inspector to be unfit for such employment.

(2) An owner of an X-ray source may permit a person who is,

- (a) over sixteen but under eighteen years of age; and
- (b) undergoing a course of training in a profession or trade in which a knowledge of X-rays is required,

to perform, under safety supervision and by way of practice, those duties of an X-ray worker which must be learned as a part of the course of training.

6.—(1) Subject to subsection 4, the owner of an X-ray source shall, when so required by the chief inspector on the advice of the medical inspector, arrange for the medical examination of an X-ray worker employed by the owner, at the expense of the owner.

(2) The examination required under subsection 1 shall be prescribed by the medical inspector and shall include such special tests as he may deem necessary.

(3) The report of the examination shall be submitted to the medical inspector within a reasonable time after the examination.

(4) Subsection 1 does not apply to an X-ray worker who is also a person mentioned in clause *a* or clause *b* of subsection 1 of section 9.

7.—(1) The owner of an X-ray source shall organize the use of the source so that,

- (a) an X-ray worker is unlikely to be exposed to doses in excess of those mentioned in Part 1 of Appendix A;
- (b) a person who is not an X-ray worker is unlikely to be exposed to doses in excess of those mentioned in Part II of Appendix A; and
- (c) in the case of an X-ray machine used for irradiation of human beings, a person who is a patient undergoing an application of therapeutic or diagnostic X-rays, prescribed by a person mentioned in clause *a* or clause *b* of subsection 1 of section 9 does not receive an unnecessarily high dose to the region of his body mentioned in the prescription, or a reasonably avoidable dose to other regions of his body.

(2) Where, in the course of application of X-rays to a patient, it is not feasible for a person mentioned in clause *a* or clause *b* of subsection 1 of section 9 to limit his exposure as prescribed by clause *a* of subsection 1, the owner shall take all reasonable steps, including those prescribed by the Department, to minimize the exposure of such persons.

(3) Where the owner of an X-ray source employs an X-ray worker,

- (a) who is also an "atomic energy worker" as defined in the *Atomic Energy Control Regulations* of Canada; and
- (b) whose total exposure for this reason may be due both to X-rays and to other radiations of similar effect on the human body,

the owner shall restrict the part of the X-ray worker's exposure which is due to X-rays so that his combined dose is unlikely to exceed the limits specified in the *Atomic Energy Control Regulations* of Canada.

8.—(1) The owner of an X-ray source shall, before an X-ray worker uses the X-ray source, provide the worker with instructions on how to operate it with safety to himself and others, and the owner shall satisfy himself that the instructions are understood by the X-ray worker.

(2) The X-ray worker shall follow the safety instructions given to him by the owner.

9.—(1) No owner of an X-ray machine shall permit his machine to be used for the purposeful irradiation of human beings,

- (a) by the therapeutic application of X-rays unless the course of X-ray treatment has been prescribed by a duly qualified medical practitioner; or
- (b) by the diagnostic application of X-rays unless the application has been prescribed by,
 - (i) a duly qualified medical practitioner, with respect to any region of the body,
 - (ii) a member of The Royal College of Dental Surgeons of Ontario in the course of the practice of his profession,
 - (iii) a person registered as a chiropractor under Regulation 119 of Revised Regulations of Ontario, 1960, with respect to any region of the body,
 - (iv) a person registered as an osteopath under Regulation 123 of Revised Regulations of Ontario, 1960, with respect to any region of the body, or
 - (v) a person registered as a chiropodist under Regulation 53 of Revised Regulations of Ontario, 1960, in the course of the practice of his profession.

(2) An owner of an X-ray machine may permit a person mentioned in clause *a* or *b* of subsection 1 to delegate the task of administering the prescribed application of therapeutic or diagnostic X-rays to a human being if the person to whom the task is delegated is,

- (a) a radiological technician registered under *The Radiological Technicians Act, 1962-63*; or
- (b) adequately trained in the opinion of the person prescribing the application and is subject to supervision to the extent considered necessary by him.

(3) Nothing in subsections 1 and 2 shall be deemed to exempt any persons mentioned therein from the general application of this Regulation.

(4) Where a person mentioned in clause *b* of subsection 1 is not available to prescribe the application of a course of diagnostic X-rays in an emergency,

- (a) a veterinary surgeon; or
- (b) a person to whom a task of applying therapeutic or diagnostic X-rays has been delegated,

may apply diagnostic X-rays to a human being.

10.—(1) An owner of an X-ray machine shall not permit his machine to be used for purposes of industrial radiography unless he has arranged that such use is exercised,

- (a) in the case of a permanent X-ray location which has been approved by the Department under section 11, under the supervision of a certified junior or senior industrial radiographer; and

- (b) in cases other than that mentioned in clause *a*, under the supervision of a certified senior industrial radiographer.

(2) The certifications referred to in subsection 1 shall be in accordance with the current standard for certification of industrial radiographic personnel issued as Standard 48-GP-4 by the Canadian Government Specifications Board.

11.—(1) On and after the date upon which this Regulation comes into force, no person shall install an X-ray machine in a place which is intended as a permanent X-ray location and the owner of the premises shall not permit such installation unless the approval of the Department therefor has been obtained.

(2) An application for the approval referred to in subsection 1 shall be in forms 2 and 3, and shall be accompanied by plan location drawings in duplicate which shall,

- (a) be to scale;
- (b) identify the owner of the X-ray machine and the owner of the premises;
- (c) show the proposed location of the X-ray machine;
- (d) indicate the occupancy of adjacent rooms, offices or other accommodation, including those above and below the space in which the X-ray machine is to be installed; and
- (e) indicate the additional structural shielding to be installed on the boundaries of the space in which the X-ray machine is to be installed.

(3) After an owner has obtained the approval referred to in subsection 1, he shall not,

- (a) install an X-ray machine of a type different from that for which the space was approved; or
- (b) install more X-ray machines in the space than were allowed for in the approval,

unless he has sought and obtained approval from the Department therefor.

(4) If so requested by the chief inspector, the owner of an X-ray machine which has been installed and used in a permanent X-ray location before this Regulation came into force shall submit to the Department the drawings and information mentioned in subsection 2 with respect to the space in which the X-ray machine is located.

12. An owner of an X-ray source shall, for the purpose of this Regulation,

- (a) permit an inspector to enter, at any reasonable time, the place where the X-ray source is used;
- (b) furnish such information as the inspector may request, concerning,
 - (i) the extent and manner of use of the X-ray source,
 - (ii) the qualifications and training of the X-ray workers,
 - (iii) the protective procedures which he has established, and
 - (iv) where an incident involving the over-exposure of any person has occurred, the technical circumstances attending the incident;

- (c) permit the inspector to make such technical tests as he may require in order to establish an estimate of the dose which an X-ray worker or other person in the vicinity of the X-ray source may receive or may have received; and

(d) permit a medical inspector to interview X-ray workers and facilitate his review of medical examination records pertaining to such workers.

13.—(1) The owner of an X-ray source shall,

(a) install such structural or other shielding as the Department may direct to prevent persons inside or outside the space in which the X-ray source is used from receiving excessive or unnecessary doses;

(b) modify, as the Department may direct the X-ray source or the manner in which it is used for the purpose of reducing the dose receivable by persons who are not patients or of preventing patients from receiving unnecessary doses;

(c) when directed by the Department, post radiation warning signs or install warning devices prescribed by the Department;

(d) post in a place where it can be read by X-ray workers and others such printed placards as may be supplied by the Department on which there appears an abstract of this Regulation or of some part thereof;

(e) when directed by the Department, provide X-ray workers with personal or survey dosimeters;

(f) provide such safety training for X-ray workers as the Department may direct; and

(g) when so directed by the Department, discontinue the use of an X-ray source, until such changes have been made respecting it or its manner of operation, as the Department may direct.

(2) The Department's direction to the owner of an X-ray source shall be in writing and specify the time within which compliance shall be effected.

M. B. DYMOND,
Minister of Health.

Dated at Toronto, this 7th day of January, 1969.

REGULATION MADE UNDER THE ENERGY ACT, 1964

1.—(1) Paragraph 39 of section 1 of Ontario Regulation 166/66, as remade by subsection 1 of section 1 of Ontario Regulation 31/68, is revoked and the following substituted therefor:

39. "gas fitter" means a person,

i. who installs, repairs, services or removes an appliance and the piping downstream from the meter to the appliance, and includes a person who,

a. cleans, oils or replaces any electrical component or accessory forming part of a gas-fired appliance and controlling the flow of gas, other than a low water cut-off,

b. disconnects and reconnects not more than five feet in horizontal measurement of water piping in order to replace water heaters with approved gas-fired water heaters and carries out the necessary replacement of controls and components that form part of an approved gas-fired water heater,

c. performs such work as is required to replace controls and components controlling the flow of gas and forming part of a gas-fired appliance, other than a low water cut-off,

d. installs, services, removes or replaces any vent-connector, together with its associated draft regulator or draft hood, and

e. installs, services, removes or replaces components and accessories controlling the flow of gas and forming part of a gas-fired refrigerating or air-conditioning unit, and

ii. who holds a certificate in Form 309;

(2) Paragraph 72 of the said section 1, as remade by subsection 2 of section 1 of Ontario Regulation 31/68, is revoked and the following substituted therefor:

72. "service gas fitter" means a person,

i. who repairs and services an appliance manufactured by his employer and who performs such work as may be necessary to remove, repair or service such appliance, and includes a person who,

a. services or replaces any electrical component or accessory forming part of a gas-fired appliance and controlling the flow of gas, other than a low water cut-off,

b. services, removes or replaces any vent-connector, together with its associated draft regulator or draft hood, and

ii. who holds a certificate in Form 313;

2.—(1) Subsection 1 of section 75 of Ontario Regulation 166/66, as remade by subsection 1 of section 2 of Ontario Regulation 31/68, is revoked and the following substituted therefor:

(1) An application for certification of a person to install, repair, service or remove any gas appliance and the piping downstream from the meter to the appliance and to,

(a) clean, oil or replace any electrical component or accessory forming part of a gas-fired appliance and controlling the flow of gas, other than a low water cut-off;

(b) disconnect and reconnect not more than five feet in horizontal measurement of water piping in order to replace water heaters with approved gas-fired water heaters and carry out the necessary replacement of controls and components that form part of a gas-fired water heater;

IN THE MATTER OF Section 379 (1) 95 of The Municipal Act, R.S.O. 1960, Chapter 249; and

IN THE MATTER OF proposed by-law 6619 of the City of Kitchener.

NOTICE IS HEREBY GIVEN that His Honour Judge David S. Charlton has appointed Tuesday, the 4th day of March, 1969, at the hour of 11.00 o'clock in the forenoon, at his Chambers in the Court House, Weber Street, Kitchener, Ontario, as the time and place for the hearing of those advocating or opposing the proposed street name changes set out in Schedule "A" to proposed By-law 6619 of the City of Kitchener which Schedule is set out below.

Any person desiring to make representations either in support of or in opposition to the proposed street name changes will then and there be heard in person, or by his or her solicitor or agent.

Any person desiring further information respecting the proposed changes may apply to the office of R. W. Pritchard, Clerk of the City of Kitchener, City Hall, Kitchener, Ontario.

Dated at Kitchener, Ontario, this 10th day of January, 1969.

ELMER L. MOORE,
City Solicitor,
The Corporation of the City of Kitchener,
City Hall, Kitchener, Ontario.

SCHEDULE "A"

Street	Location	New Street Name	Reason for Change
Strasburg Road	Avalon Place to Stirling Avenue	Southmoor Drive	This part of Strasburg Road will be separated from the southerly part of Strasburg Road by the K-W Expressway.
Idlewood Drive	Fergus Avenue to Woodland Cemetery	Clover Place	Idlewood Drive was to have been connected across Woodland Cemetery to join Idlewood Drive as established north of the Cemetery. This connection has not happened.
Huron Avenue	Lorne Crescent to Lorne Crescent	Seneca Drive	This name was applied to this street before the old pioneer Huron Road was annexed to the City. The old Huron Road is now in the City and mail and deliveries are now being confused.
Schmidt Street	Thaler Avenue to easterly end	Kinzie Avenue	Kinzie Avenue has been opened from Rutherford Avenue to Thaler Avenue and now forms a continuous street with Schmidt Street.

Street	Location	New Street Name	Reason for Change
Confederation Court	Confederation Drive to north limit Lot 129, Plan 1203	Champlain Crescent	This was formerly proposed to be a cul-de-sac, but in Registered Plan 1253 it is converted to a crescent.
Raddatz Lane	Waverly Street to Belmont Avenue	Gage Street	Raddatz Lane has recently been opened to Belmont Avenue. It is directly in line with Gage Street.
First Avenue	Vanier Drive to Courtland Avenue	Shelley Drive	This street is a continuation of Shelley Drive although not yet connected across Vanier Drive.
Regent Street	Ottawa Street to easterly city limits	Old Chicopee Road	Petition from two property owners
Sheldon Street	Shaftesbury Drive to Natchez Road	Ebydale Drive	This part of the street is detached from the main part of Sheldon Street by a new subdivision and the K-W Expressway. Ebydale was the name of the farm before the subdivision was established.
Sims Road	King Street to Fairway Road	Morgan Avenue	This part of Sims Road is now detached from the remaining part because part of Sims Road became Fairway Road in the last by-law which changed street names. It now appears as a continuation of Morgan Avenue.
Ottawa Street	from beginning of Ottawa Street diversion to Kehl Street	Kehl Street	In connection with K-W Expressway construction Ottawa Street is diverted southerly near Kehl Street leaving a short section leading to Kehl Street. This short part needs a new name.
Henry Sturm Boulevard	Ardelt Avenue to C.N.R. Railway	Ardelt Place	Henry Sturm Boulevard will not exist as an access street after the K-W Expressway is in operation. The local street leading past Canadian Machinery Corp. and to Dutchmen Homes Limited requires a new name.
Henry Sturm Boulevard	Courtland Avenue to C.N.R. Railway	Overland Drive	Henry Sturm Boulevard will not exist as an access street after the K-W Expressway is in operation. The local street leading to Consolidated Truck Lines Limited requires a new name.
Henry Sturm Boulevard	Ottawa Street to C.N.R. Railway	Imperial Drive	A service road has been built from Ottawa Street to the Imperial Plywoods warehouse along the north side of the Expressway.

The changes set out above are several and no one of them is dependent on any other or others of them.

THE CORPORATION OF THE CITY OF HAMILTON

NOTICE IS HEREBY GIVEN that The Corporation of the City of Hamilton will apply to the Legislative Assembly of the Province of Ontario at its next session, for special legislation: To authorize The Corporation of the City of Hamilton to use certain lands in the block bounded by Merrick Street, James Street, Market Square and MacNab Street in the City of Hamilton, and occupied by a market, for any use or purpose compatible with the development of the Civic Square presently under construction pursuant to an Urban Renewal program for this part of the City, completely free from any market use. The land in the above block had originally been conveyed to the City between 1837 and 1856 by various owners with the understanding that the lands be used for market purposes. The City of Hamilton Act, 1959, c. 116, s. 1, was passed to enable the construction of an overhead parking garage, provided that the land be still used for market purposes if so required by the understanding with the original owners as set out in the various documents transferring ownership to the City.

Dated at Hamilton, Saturday, the 18th day of January, 1969.

E. A. SIMPSON,
City Clerk.

Proclamations

(Great Seal of Ontario) W. R. MACDONALD

PROVINCE OF ONTARIO

ELIZABETH THE SECOND, by the Grace of God of the United Kingdom, Canada and Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith.

TO: THE HONOURABLE DONALD A. KEITH,
One of Her Majesty's Justices of the Supreme Court of Ontario.

GREETING:

PROCLAMATION

WHEREAS by an Act to provide for Provincial Courts and Judges which by Our Royal Proclamation did come into force on the second day of December, A.D. 1968, it is enacted that for the purpose of making an enquiry under sub-section 1 of section 4 thereof, Our Lieutenant Governor in Council may appoint one or more judges of Our Supreme Court of Ontario who shall make the enquiry and report thereon and a judge so appointed has all the powers that may be conferred upon a commissioner under The Public Inquiries Act;

AND WHEREAS Our Lieutenant Governor in Council of Our Province of Ontario deems it expedient to cause enquiry to be made concerning the matters hereinafter mentioned:

NOW KNOW YE that We, having and reposing full trust and confidence in you the said DONALD A. KEITH, DO HEREBY APPOINT you to be Our Commissioner,

to inquire into and report upon the circumstances relating to the behaviour or misbehaviour of Provincial Judge Lucien Coe Kurata and respecting his ability or inability to perform his duties properly including an alleged attempt by the said judge to commit suicide on September 1st, 1968 and an alleged incident involving the said judge with policewoman Marlene Watson.

AND WE DO HEREBY CONFER on you, Our said Commissioner, the power to summon any person and require him to give evidence on oath and to produce such documents and things as you Our said Commissioner deem requisite for the full investigation of the matters into which you are appointed to examine;

AND WE DO HEREBY FURTHER ORDER that all Our Departments, Boards, Commissions, Agencies and Committees shall assist you, Our said Commissioner, to the fullest extent in order that you may carry out your duties and functions and you shall have the authority to engage such counsel, investigators and other staff as you deem proper at rates of remuneration and reimbursement to be approved by the Treasury Board of Our Province of Ontario; TO HAVE, HOLD AND ENJOY the said office and authority of Commissioner for and during the pleasure of Our Lieutenant Governor in Council for Our Province of Ontario.

IN TESTIMONY WHEREOF We have caused these Our Letters to be made Patent and the Great Seal of Our Province of Ontario to be hereunto affixed.

WITNESS:

TREASURER'S SALE OF LANDS FOR ARREARS OF TAXES

CITY OF ORILLIA

To Wit:

BY VIRTUE OF A WARRANT issued by the Mayor of the City of Orillia bearing date the 29th day of January, 1969, and to me directed, commanding me to levy upon the several parcels of lands herein described and hereinafter mentioned as being in the City of Orillia, in the County of Simcoe, for arrears of taxes, I hereby give notice that, unless the arrears of taxes, together with the lawful costs and charges, are sooner paid, I shall, on the 18th day of June, 1969, at 10.00 o'clock in the forenoon, in the Conucil Chambers in the City Hall of the City of Orillia, proceed to sell by public auction the said lands to the highest bidder, providing such bid equals or exceeds the amount necessary for payment of the said taxes and costs.

An adjourned sale, if necessary, will be held in the same place, at the same hour, on the 25th day of June, 1969.

Dated this 11th day of February, 1969.

BRUCE D. BAYNE,
Treasurer, City of Orillia.

TREASURER'S SALE OF LANDS FOR ARREARS OF TAXES

CITY OF HAMILTON, COUNTY OF WENTWORTH

To Wit:

BY VIRTUE OF A WARRANT, as subjoined, issued by the Mayor of the City of Hamilton, and bearing the date of March 1, 1969, for the collection of arrears of assessments or taxes upon the undermentioned lands in the City, all such being patented lands, I shall on the 12th day of June, 1969, at the hour of 11.00 o'clock in the forenoon, and upon the following day or days until the sale is completed, at the City Hall, Hamilton, proceed to sell the said lands by public auction for the highest amount bid, or such amount as shall be necessary, to pay such arrears, together with all charges thereon, unless the same be sooner paid.

JACK C. JAGGARD,
City Treasurer.

To Jack C. Jaggard, Esq.,
City Treasurer.

You are hereby authorized and directed to levy upon the lands described in the lists hereunto annexed, the arrears of taxes and water rates due thereon and all costs and charges authorized by Statute in that behalf, and to proceed in the sale for the said arrears of taxes and water rates, and costs as the law directs.

As witness my hand and Seal of the Corporation of the City of Hamilton, this 1st day of March, 1969.

VICTOR K. COPPS,
Mayor.

THE ONTARIO WATER RESOURCES COMMISSION ACT

O. Reg. 46/69.

Water Wells.

Made—January 8th, 1969.

Approved—February 6th, 1969.

Filed—February 17th, 1969.

REGULATION MADE UNDER THE ONTARIO WATER RESOURCES COMMISSION ACT

WATER WELLS

INTERPRETATION

1.—(1) For the purpose of clause i of subsection 1 of section 47 of the Act and this Regulation, "owner" means the person registered as owner in fee simple of the land upon which a water well is situated.

(2) In this Regulation,

- (a) "abandoned well" means a well that is not being used or maintained for future use as a well;
- (b) "air vent" means an outlet at the upper end of the well casing that allows for equalization of air pressure between the inside of the well casing and the atmosphere, and for the release of gases from the well;
- (c) "annular space" means open space between the casing and the sides of a well;
- (d) "aquifer" means a water-bearing formation that transmits or is capable of transmitting water in sufficient quantities to serve as a source of water supply;
- (e) "bedrock" means the solid rock underlying unconsolidated material such as sand, gravel and clay;
- (f) "casing" means pipe or tubing installed in a well to support the sides of the well;
- (g) "contractor" means a person who carries on the business of drilling or boring wells for water;
- (h) "date of completion" means the date on which the well-construction equipment is removed from the site of a well;
- (i) "flowing well" means a well that has a static water level above the surface of the ground;
- (j) "static water level" means the level attained by water in or from a well when no water is being taken from the well;
- (k) "water well record" means Form 7 duly completed;
- (l) "well" means a hole made in the ground to obtain, locate or test in respect of water by any means other than by digging.

LICENCES TO DRILL AND BORE WELLS

2.—(1) An application for a licence to carry on the business of drilling wells for water shall be in Form 1.

(2) A licence to carry on the business of drilling wells for water shall be in Form 2.

(3) An application for renewal of licence in Form 2 shall be in Form 3.

3.—(1) An application for a licence to carry on the business of boring wells for water shall be in Form 4.

(2) A licence to carry on the business of boring wells for water shall be in Form 5.

(3) An application for renewal of licence in Form 5 shall be in Form 6.

4. The fee for a licence in Form 2 or Form 5 or renewal thereof is \$10.

5.—(1) A licence in Form 2 to carry on the business of drilling wells for water is issued on the condition that,

- (a) where the holder is not a corporation, he has had at least two years' experience in drilling wells or equivalent experience, or he retains in his full-time employ a person who has had at least two years' experience in drilling wells or equivalent experience;
- (b) where the holder is a corporation, it retains in its full-time employ a person who has had at least two years' experience in drilling wells or equivalent experience; and
- (c) the holder tests the yield of every well drilled and delivers within two weeks of the date of completion a copy of the water well record in Form 7 to the person who contracted for the drilling of the well.

(2) A licence in Form 5 to carry on the business of boring wells for water is issued on the condition that,

- (a) where the holder is not a corporation, he has had at least two years' experience in boring wells or equivalent experience, or he retains in his full-time employ a person who has had at least two years' experience in boring wells or equivalent experience;
- (b) where the holder is a corporation, it retains in its full-time employ a person who has had at least two years' experience in boring wells or equivalent experience; and
- (c) the holder tests the yield of every well bored and delivers within two weeks of the date of completion a copy of the water well record in Form 7 to the person who contracted for the boring of the well.

CONSTRUCTION AND MAINTENANCE

6.—(1) Where a well is bored or drilled, the contractor shall install casing,

- (a) of new material;
- (b) of sufficient length to prevent impairment of the quality of ground water;
- (c) of minimum wall thickness sufficient to prevent the failure of the casing during the construction and operation of the well and in particular, and without limiting the generality of the foregoing, where the casing is of the following materials the wall thicknesses shall be:

1. Nominal 0.188 inches and minimum 0.165 inches for steel casing with an inside diameter of more than two inches.
 2. Nominal 0.094 inches and minimum 0.082 inches for steel casing with an inside diameter of two inches or less.
 3. 18 gauge for combined corrugated and galvanized steel casing used in bored wells; and
- (d) with any joints made in such a manner that no substance that may impair the quality of the water can enter the well through the joints.
- (2) Where a well is drilled, the contractor shall,
- (a) construct that portion of the drilled well from the land surface at the well site to a minimum depth of ten feet, with a minimum diameter two inches greater than the diameter of the proposed finished well;
 - (b) fill the annular space from a depth of eight feet or less from the land surface to a minimum depth of ten feet from the land surface, with cement grout, concrete, bentonite or equivalent commercial slurry, or clay slurry; and
 - (c) fill the remaining annular space to the land surface, with bentonite or equivalent commercial slurry, clay slurry, well cuttings, or overburden materials.
- (3) Where a well is drilled through the bottom of a dug or bored well, the contractor shall,
- (a) extend the casing of the drilled well through the dug or bored portion of the well to within eight feet or less of the land surface at the well site; and
 - (b) fill the space from the bottom of the dug or bored portion of the well to a height of at least two feet with cement grout or concrete; or
 - (c) construct the drilled well for a minimum distance of three feet below the bottom of the dug or bored portion of the well, with a minimum diameter four inches greater than the diameter of the proposed finished well and fill the annular space below the bottom of the dug or bored well with cement grout or concrete.
- (4) Where a drilled well obtains its main water supply from a bedrock aquifer and from ten feet or more below the interface of the bedrock and overburden, the contractor shall firmly seat the casing in the bedrock and if necessary shall grout it into the bedrock to prevent the impairment of the quality of the water in the well and aquifer.
- (5) Where a well is bored to a depth of more than eight feet, the contractor shall,
- (a) fill the annular space from the bottom of the well to a level not less than eight feet from the land surface with clean washed gravel or sand;
 - (b) fill the annular space from a depth of eight feet or more from the land surface to the land surface with cement grout, concrete, bentonite or equivalent commercial slurry, clay slurry or puddled clay; and
 - (c) make or cause to be made watertight all joints in the well casing from its top to a level not less than eight feet below the land surface.
- (6) Where a well is bored to a depth of eight feet or less, the contractor shall,
- (a) fill the annular space from the bottom of the well to a level not less than four feet from the land surface with clean washed gravel or sand;
 - (b) fill the remaining annular space to the land surface with cement grout, concrete, bentonite or equivalent commercial slurry, clay slurry or puddled clay; and
 - (c) make or cause to be made watertight all joints in the well casing in at least the top four feet thereof.
- (7) The contractor shall locate a bored well wherever possible at an elevation higher than that of the immediate surrounding area.
- (8) The contractor shall extend the casing of a bored well at least six inches above the land surface at the well site.
- (9) Where a well casing extends above the land surface, the contractor shall ensure that drainage in the area of the well is in a direction away from the well.
- 7.—(1) When the construction of a well is completed, except in the case of a flowing well, the contractor shall,
- (a) chlorinate the water in the well, either prior to or after testing the yield of water from the well, by creating a concentration of 250 parts per million of chlorine in the water in the well; and
 - (b) maintain or cause to be maintained the said concentration of chlorine in the water in the well for a minimum period of twelve consecutive hours.
- (2) Where a pump is installed immediately after a well is completed, the water in the well may be chlorinated in the manner prescribed in section 14.
8. When a well is completed, the contractor shall cap the upper open end of the casing securely in a manner sufficient to prevent the entry into the casing of surface water or other foreign materials.
9. Where a flowing well is constructed, the contractor shall install a device that is capable of controlling the discharge of water from within the well casing.
10. No person shall construct or use or cause or permit the construction or use of a well pit that will allow the entry of surface water or other foreign materials into a well or aquifer.
11. The owner of a well shall maintain it at all times after the completion date in a manner sufficient to prevent the entry into the well of surface water or other foreign materials.
- PUMP INSTALLATION
- 12.—(1) Where a connection to the casing of a drilled well is made below the surface of the ground, the person who makes the connection shall install either a well seal or a pitless adapter, both commercially manufactured for the purpose, and shall make the connection watertight.
- (2) Where a connection to the casing of a bored well is made below the surface of the ground, the person who makes the connection shall,
- (a) make it watertight with a durable sealing material; and

- (b) fill the excavation with cement grout, bentonite or equivalent commercial slurry, clay slurry or puddled clay extending from the well casing a minimum distance outward of one foot and extending from the bottom of the excavation to within two feet of the land surface.

13.—(1) Where pumping equipment is installed in a drilled well, other than a well in which the casing is used to transmit water out of the well, the person who installs the equipment shall,

- (a) where the inside diameter of the well casing is less than five inches, install an air vent that has a minimum inside diameter of one-quarter of one inch;
- (b) where the inside diameter of the well casing is five inches or more, install an air vent that has a minimum inside diameter of one-half of one inch;
- (c) where a well pit exists, extend the air vent to within six inches or less below the top of the well pit;
- (d) where a well pit does not exist, extend the air vent a minimum of twelve inches above the level of the land surface; and
- (e) shield and screen the open end of the air vent in a manner sufficient to prevent the entry into the air vent of any material that may impair the quality of the water in the well.

(2) Where pumping equipment other than a vertical-turbine pump is installed in a drilled well, the person who installs the equipment shall seal the top of the well casing with a well cap commercially manufactured for the purpose.

(3) Where a vertical-turbine pump is installed in a well, the person who installs the pump shall,

- (a) where a floor has been constructed around or adjacent to the casing of the well, extend the casing a minimum of six inches above the level of the floor;
- (b) where no floor exists, extend the casing of the well a minimum of twelve inches above the level of the land surface at the well site; and
- (c) shield the top of the casing of the well in a manner sufficient to prevent the entry into the well of any material that may impair the quality of the water in the well.

14. Where pumping equipment is installed in a well, the person who installs the equipment shall,

- (a) chlorinate the water in the well and the pumping equipment, by creating a concentration of 250 parts per million of chlorine in the water in the well and by causing the chlorinated water to come into contact with all areas of the pumping equipment which will come into contact with water from the well when the well is put into use;
- (b) maintain or cause to be maintained the said concentration of chlorine in the water in the well and the contact of the chlorinated water with the areas of the pumping equipment as stated in clause *a* for a minimum period of twelve consecutive hours; and
- (c) upon the expiration of the period of time stated in clause *b*, pump the chlorinated water from the well until such time as there is no odour of chlorine from the said water.

TESTING OF WELL YIELD

15.—(1) When the yield of water from a well is tested and the pumping equipment used will permit the measurement of water levels in the well, the contractor shall,

- (a) measure and record on the water well record in Form 7 the static water level in the well immediately prior to the commencement of pumping;
- (b) pump water from the well continuously for a minimum period of one hour;
- (c) measure and record on the water well record in Form 7 water levels in the well at fifteen minute intervals from the commencement of pumping for a period of one hour, and in addition, immediately prior to the end of the test, if the test is longer than one hour; and
- (d) record on the water well record in Form 7 at the end of the test the rate of pumping during the test.

(2) The contractor shall measure water levels by means of a tape, air line or electrical device.

(3) If water from the well cannot be pumped continuously for one hour the contractor shall record on the water well record in Form 7,

- (a) the reason pumping was discontinued;
- (b) the rate of pumping and the length of the pumping period; and
- (c) the water-level measurements made.

16.—(1) When the yield of water from a well is tested and a bailer or other pumping equipment is used that will not permit the accurate measurement of water levels in the well, the contractor shall,

- (a) measure and record on the water well record in Form 7 the static water level in the well immediately prior to the commencement of bailing or pumping;
- (b) bail or pump water from the well continuously for a minimum period of one hour;
- (c) measure and record on the water well record in Form 7 water levels in the well at the termination of bailing or pumping and at fifteen minute intervals thereafter for a period of one hour, and in addition, immediately prior to the end of the observation period, if the recovery of water levels is measured for longer than one hour; and
- (d) record on the water well record in Form 7 at the end of the test the rate of bailing or pumping during the test.

(2) The contractor shall measure water levels by means of a tape, air line or electrical device.

(3) If water from the well cannot be bailed or pumped continuously for one hour the contractor shall record on the water well record in Form 7,

- (a) the reason bailing or pumping was discontinued;
- (b) the rate of bailing or pumping and the length of the bailing or pumping period; and
- (c) the water level measurements made.

<div>CONTAMINATION CONTROL</div> <div>17.—(1) Where a contractor bores or drills a well and salty, sulphurous or other non-potable water is encountered, the contractor shall immediately notify the owner that such condition exists, and the owner shall forthwith seal off or cause to be sealed off the water in a manner sufficient to prevent impairment of the quality of the ground water.</div> <div>(2) Where salty, sulphurous or other non-potable water enters a well after the date of completion, the owner shall forthwith seal off or cause to be sealed off such water in a manner sufficient to prevent impairment of the quality of the ground water.</div> <div>PLUGGING OF DRY OR ABANDONED WELLS</div> <div>18. When a well is dry or abandoned, the owner shall forthwith seal and fill the well with clean material in a manner sufficient to prevent the vertical movement of water in it.</div>	<div>RECORDS AND RETURNS</div> <div>19. THE CONSERVATION AUTHORITIES ACT,
1968

O. Reg. 47/69.
Fill and Construction—Lower Thames
Valley.
Made—February 5th, 1969.
Approved—February 13th, 1969.
Filed—February 17th, 1969.

REGULATION MADE UNDER
THE CONSERVATION AUTHORITIES ACT, 1968

1. In this Regulation,
- (a) "Authority" means The Lower Thames Valley Conservation Authority;
 - (b) "building or structure" means a building or structure of any kind;
 - (c) "fill" means fill of any kind.
2. The areas described in the schedules are areas in which, in the opinion of the Authority, the control of flooding or pollution or the conservation of land may be affected by the placing or dumping of fill.
3. Subject to section 4, no person shall,
- (a) construct any building or structure or permit any building or structure to be constructed in or on a pond or swamp or in any area below the high-water mark of a lake, river, creek or stream in or on the area under the jurisdiction of the Authority; or
 - (b) place or dump fill or permit fill to be placed or dumped in the areas described in the schedules.
4. Subject to *The Ontario Water Resources Commission Act* or to any private interest, the Authority may permit in writing the construction of any building or structure or the placing or dumping of fill in any area to which section 3 applies if, in the opinion of the Authority, the site of the building or structure or the placing or dumping and the method of construction or placing or dumping will not affect the control of flooding or pollution or the conservation of land.
5. No person shall commence to construct any building or structure or dump or place fill in any area to which section 3 applies before the permission required by section 4 has been obtained.
- 6.—(1) A signed application for permission to construct a building or structure shall be filed with the Authority and shall include,

- (a) four copies of a plan of the property showing the proposed location of the building or structure, its elevation and the proposed final grade plan;
 - (b) four copies of a complete description of the type of building or structure to be constructed, including drainage details;
 - (c) four copies of a statement of the dates between which the construction will be carried out; and
 - (d) four copies of a statement of the proposed use of the building or structure following completion of the construction.
- (2) A signed application for permission to place or dump fill shall be filed with the Authority and shall include,
- (a) four copies of a plan of the property on which the fill is to be placed, showing the proposed location of filling the depth to which it is proposed to fill and the proposed final grade of the land when filling is completed;
 - (b) four copies of a complete description of the type of fill proposed to be placed or dumped;
 - (c) four copies of a statement of the dates between which the placing or dumping will be carried out; and
 - (d) four copies of a statement of the proposed use of the land following completion of placing or dumping.
7. The Authority may, at any time, withdraw any permission given under section 4 if, in the opinion of the Authority, the representations contained in the application for the permission are not carried out.
8. Ontario Regulation 69/62 is revoked.

LOWER THAMES VALLEY CONSERVATION
AUTHORITY:

CLARENCE M. WILSON,
Chairman.

ANTHONY J. READ,
Secretary-Treasurer.

Dated at Chatham, this 5th day of February, 1969.

Schedule 1

That land along the River Thames from the easterly limits of the City of Chatham to the line between lots 20 and 21, formerly the Township of Dover and the production of that line to the south, and being those areas shown on defined area maps No.'s 1, 2, 3, 4 and 5 labelled Fill Regulations, Defined Area, Thames River and McGregor's Creek, City of Chatham filed in the office of the Registrar of Regulations at Toronto as No.'s 902 to 906, both inclusive.

Schedule 2

That land along McGregor's Creek from its confluence with the Thames River to the southerly limits of the City of Chatham, and being shown on defined area maps No. 4 and No. 5 filed in the office of the Registrar of Regulations at Toronto as No.'s 907 and 908.

THE CONSERVATION AUTHORITIES ACT, 1968

O. Reg. 56/69.

Fill and Construction—Hamilton Region.

Made—February 7th, 1969.

Approved—February 20th, 1969.

Filed—February 21st, 1969.

REGULATION MADE UNDER
THE CONSERVATION AUTHORITIES ACT, 1968FILL AND CONSTRUCTION—HAMILTON
REGION

1. In this Regulation,

- (a) "Authority" means the Hamilton Region Conservation Authority;
- (b) "building or structure" means a building or structure of any kind;
- (c) "fill" means fill of any kind.

2. The areas described in the schedules are areas in which, in the opinion of the Authority, the control of flooding or pollution or the conservation of land may be affected by the placing or dumping of fill.

3. Subject to section 4, no person shall,

- (a) construct any building or structure or permit any building or structure to be constructed in or on a pond or swamp or in any area below the high-water mark of a lake, river, creek or stream in or on the area under the jurisdiction of the Authority; or
- (b) place or dump fill or permit fill to be placed or dumped in the areas described in the schedules.

4. Subject to *The Ontario Water Resources Commission Act* or to any private interest, the Authority may permit in writing the construction of any building or structure or the placing or dumping of fill in any area to which section 3 applies if, in the opinion of the Authority, the site of the building or structure or the placing or dumping and the method of construction or placing or dumping will not affect the control of flooding or pollution or the conservation of land.

5. No person shall commence to construct any building or structure or dump or place fill in any area to which section 3 applies before the permission required by section 4 has been obtained.

6.—(1) A signed application for permission to construct a building or structure shall be filed with the Authority and shall include,

- (a) four copies of plan of the property showing the proposed location of the building or structure, its elevation and the proposed final grade plan;
- (b) four copies of a complete description of the type of building or structure to be constructed, including drainage details;
- (c) four copies of a statement of the dates between which the construction will be carried out; and
- (d) four copies of a statement of the proposed use of the building or structure following completion of the construction.

(2) A signed application for permission to place or dump fill shall be filed with the Authority and shall include,

- (a) four copies of a plan of the property on which the fill is to be placed, showing the proposed location of filling, the depth to which it is proposed to fill and the proposed final grade of the land when filling is completed;
- (b) four copies of a complete description of the type of fill proposed to be placed or dumped;
- (c) four copies of a statement of the dates between which the placing or dumping will be carried out; and
- (d) four copies of a statement of the proposed use of the land following completion of placing or dumping.

7. The Authority may, at any time withdraw any permission given under section 4 if, in the opinion of the Authority, the representations contained in the application for the permission are not carried out.

NOTICE

TOWN OF DEEP RIVER, COUNTY OF RENFREW

CHANGE OF STREET NAMES

TAKE NOTICE that pursuant to The Municipal Act, R.S.O. 1960, Chapter 249, Section 379, Subsection (1) (95) (c), I hereby appoint Friday, the 25th day of April, 1969, at 12.00 o'clock noon, at the Court House, Pembroke, to consider proposed By-law No. 588 of the Corporation of the Town of Deep River and to hear those advocating or opposing the changes.

By-law No. 588 of the Corporation of the Town of Deep River is as follows:

WHEREAS Plan 389 of the Town of Deep River was registered showing thereon two streets, to wit, Sheridan Place running easterly from Thomas Street and River Road, an extension easterly of Thomas Street from its most northerly point;

AND WHEREAS with respect to Sheridan Place the said name is liable to cause confusion by virtue of the existence in the Town of Deep River of another street having the name "Sheridan";

AND WHEREAS the easterly extension of Thomas Street from its northerly point as shown on the said plan and named on the said plan "River Road" was intended to connect with the existing River Road in the Town of Deep River;

AND WHEREAS such connection has not been made and it is unlikely that such connection will ever be made;

NOW THEREFORE The Municipal Council of the Town of Deep River enacts as follows:

1. KENNEDY PLACE: That the name of the street designated as "Sheridan Place", Plan 389, Town of Deep River be changed to "Kennedy Place".
2. BEATTY ROAD: That the name of the street designated as "River Road", Plan 389, Town of Deep River, be changed to "Beatty Road".

Dated at Pembroke, Ontario, this 28th day of February, 1969.

THE DEPARTMENT OF TOURISM AND INFORMATION ACT, 1966

O. Reg. 81/69.

Grants for Museums.

Made—March 6th, 1969.

Filed—March 12th, 1969.

REGULATION MADE UNDER THE DEPARTMENT OF TOURISM AND INFORMATION ACT, 1966

GRANTS FOR MUSEUMS

INTERPRETATION

1.—(1) In this Regulation,

- (a) "cost of the museum" means the cost of,
 - (i) maintaining the museum buildings, premises and equipment,
 - (ii) museum office expenses,
 - (iii) travelling expenses of curators on museum business,
 - (iv) the provision of museum services to schools or other educational agencies,
 - (v) museum advertising and publicity,
 - (vi) purchase or conservation of collections;
- (b) "council of a band" has the same meaning as in the *Indian Act* (Canada);
- (c) "curator" means the person who is responsible for the custody, maintenance and content of the historical objects in a museum and who has charge of the administration thereof.

(2) For the purposes of this Regulation that part of one or more museums that is appropriate for the administration of one curator shall be deemed to be one museum.

MUSEUM GRANTS

2.—(1) Where a municipal corporation, a conservation authority or the council of a band,

- (a) owns and maintains a museum that is open to the public for at least 360 hours in a year and at least sixty days in that year;
- (b) appropriates funds to pay all or part of the cost of the museum; and
- (c) does not receive money for the operation of the museum from any other provincial agency,

the municipal corporation, the conservation authority or the council of a band, as the case may be, shall be paid a grant for each such museum of,

- (d) the lesser of,
 - (i) \$600, or
 - (ii) the amount expended by the municipal corporation, the conservation authority, or the council of a band, as the case may be, for the cost of the museum less the amount of the grant received in respect of the preceding year under this Regulation or any predecessor thereof; and
- (e) $33\frac{1}{3}$ per cent of the annual salary of each curator and assistant curator of the museum, but not exceeding a total of \$400 for each museum.

(2) In addition to the grant payable under subsection 1, where a municipal corporation, a conservation authority or the council of a band establishes a museum that it owns and maintains and the museum is first opened to the public after this Regulation comes into force, the municipal corporation, the conservation authority, or the council of a band, as the case may be, shall be paid a grant of,

- (a) the amount expended by the municipal corporation, the conservation authority, or the council of a band, for the purpose of establishing the museum in each of the two years previous to the opening, but not exceeding \$600 in each year; and
- (b) $33\frac{1}{3}$ per cent of the salary of each curator and assistant curator of the museum, in each of the two years previous to the opening but not exceeding a total of \$400 for the museum in each year.

3. Where two or more municipal corporations, two or more conservation authorities or the councils of bands are eligible for grants under this Regulation for a museum that they own and maintain jointly, the municipal corporations, the conservation authorities or the councils of the bands, as the case may be, shall designate by agreement one of them to whom all the grants payable under this Regulation for the museum may be paid.

4. Where in any year the amount voted by the Legislature for the grants under this Regulation is insufficient to pay the grant in full, the Minister may make a *pro rata* reduction.

5. No application for an annual or retroactive grant shall be accepted after the 30th day of June in the year in which the grant is payable.

REVOCATIONS

6. Ontario Regulations 293/61, 55/62 and 205/63 are revoked.

THE DEPARTMENT OF EDUCATION ACT

O. Reg. 82/69.

General Legislative Grants.

Made—March 12th, 1969.

Approved—March 13th, 1969.

Filed—March 13th, 1969.

REGULATION MADE BY THE MINISTER UNDER THE DEPARTMENT OF EDUCATION ACT

GENERAL LEGISLATIVE GRANTS

INTERPRETATION

1. In this Regulation,

- (a) "assessment" means the sum of,
 - (i) the assessment of all property, including business assessment, rateable for the purposes of the board in the area under its jurisdiction, as shown on the assessment roll on which taxes were levied for the preceding year, adjusted by the provincial equalizing factor, and
 - (ii) where money was received in the preceding year by the board under section 35 of *The Assessment Act* or clause b of section 5 of Ontario Regulation 104/67, as amended, the amount equivalent to that which, if levied upon at the rate of real-property taxation on the rate-payers supporting the board, would result in taxation equal to the money so received by the board, adjusted by the provincial equalizing factor;
- (b) "assessment per weighted pupil" for a board means the integral quotient obtained by dividing the assessment by the enrolment on the last school-day of September of the preceding year of resident-internal and resident-external pupils adjusted by the application of the appropriate weighting factors;
- (c) "average daily enrolment" means the quotient obtained by dividing the perfect aggregate attendance of pupils excluding trainable retarded pupils in a year by the number of legal school-days in that year;
- (d) "non-resident pupil" means a pupil, other than a trainable retarded pupil, enrolled at a school operated by the board and whose fee is receivable from another board, from the Minister, or from Canada;
- (e) "provincial equalizing factor" means the factor determined by the Department of Municipal Affairs to adjust local assessment to the assessment to be used for grant purposes;
- (f) "resident-internal pupil" means a pupil enrolled at a school operated by the board other than,
 - (i) a trainable retarded pupil, or
 - (ii) a pupil whose fee is receivable from another board, from the Minister, from Canada or from a source outside Ontario;
- (g) "resident-external pupil" means a pupil, other than a trainable retarded pupil, whose fee is payable by a board;

(h) "location weighting factor" means,

- (i) for a pupil who resides in a provisional county or in a territorial district, 1.1,
- (ii) for a pupil who resides in an urban municipality having a population of 190,000 or more as determined by reference to the municipal census taken in the preceding year and who is enrolled,
 - a. in an elementary school, 1.2, or
 - b. in a secondary school, 1.1.
- (iii) for a pupil other than for a pupil referred to under subclause i or ii, 1;

(i) "course weighting factor" means,

- (i) for a pupil who is enrolled in the regular day classes in an elementary school, 1,
- (ii) for a pupil who is enrolled in the regular day classes in the Business and Commerce Branch in a secondary school, 1.05,
- (iii) for a pupil who is enrolled in the regular day classes in the Science, Technology and Trades Branch in a secondary school or who is enrolled in a special vocational school or in an occupational program in a secondary school, 1.6, or
- (iv) for a pupil, other than a pupil referred to under subclause ii or iii, 1.

but where a pupil is enrolled in a course in français in a secondary school, the factors referred to in subclauses ii, iii and iv shall be multiplied by 1.05.

(j) "pupil accommodation charge" means,

- (i) \$40 per pupil of average daily enrolment for elementary schools,
- (ii) \$75 per pupil of average daily enrolment for secondary schools, and
- (iii) \$120 per pupil of average daily enrolment for trainable retarded children;

(k) "year" means the period from and including the 1st day of January to and including the 31st day of December next following.

(l) "perfect aggregate attendance" means the sum of,

- (i) the perfect aggregate attendance as defined in *The Schools Administration Act*, and
- (ii) the number representing the sum of the products of,
 - a. the number of pupils enrolled in each summer-school course or each evening course of study operated by the board, and
 - b. one-fifth of the number of hours in the length of such summer-school course or such evening course of study,

less one-fifth of the number of pupil hours' non-attendance caused by,

- c. deaths,

d. late registrations,

e. termination of registrations,

f. expulsions, and

g. exclusions.

2. "Recognized extraordinary expenditure" shall be subject to the approval of the Minister.

3. For the purposes of this Regulation The Metropolitan Toronto School Board and the boards of education as provided in section 126 of *The Municipality of Metropolitan Toronto Act* shall be deemed to be a divisional board of education and the area municipalities as provided in section 1 of that *Act* shall be deemed to be one urban municipality.

4.—(1) The general legislative grants payable under this Regulation shall be calculated for a board of education as though the board were a public-school board and a high-school board.

(2) The grant payable in respect of a public- or separate-school board shall be applied to such elementary-school purposes as the public- or separate-school board deems expedient.

(3) The grant payable in respect of a high-school board with the exception of the grant provided under section 15 shall be applied to such high-school purposes as the high-school board deems expedient.

CONTINGENCIES OF GRANTS

5.—(1) Where a board does not comply with the Acts administered by the Minister or the Regulations thereunder, the Minister may withhold the whole or any part of a grant payable until the board has taken the action necessary to correct the condition that caused the grant to be withheld.

(2) Where the grant payable under this Regulation is for any reason overpaid, the board shall refund the amount of the overpayment to the Province of Ontario.

(3) Where the grant payable under this Regulation is for any reason underpaid, the amount of the underpayment shall be paid to the board.

(4) Where the grant payable to a board under a previous regulation was either overpaid or underpaid, the overpayment or the underpayment, as the case may be, shall be added to or recovered from the grant payable under this Regulation to the board that has jurisdiction over the area of the board for which the adjustment is necessary.

(5) Where the grant payable to a former retarded children's education authority under a previous regulation was either overpaid or underpaid, the overpayment or underpayment, as the case may be, shall be added to or recovered from the grant payable under this Regulation to the board that operates the school of the former authority.

6.—(1) The grant payable under this Regulation shall be paid in the number of instalments and at the times designated by the Minister.

(2) Where in any year the amount voted by the Legislature for the grants under this Regulation is insufficient or more than sufficient to pay the grants in full, the Minister may make a *pro rata* reduction or increase, as the case may be.

PART 1

GRANTS FOR ORDINARY EXPENDITURE

7. In this Part, financial data exclude revenue and expenditure on behalf of classes or schools for trainable retarded children.

RATE OF GRANT

8. The percentage rate of grant for a board shall be the excess, correct to two places of decimals, of 100 over the product of 58 and the quotient obtained by dividing the board's assessment per weighted pupil,

- (a) in the case of an elementary-school board, by \$34,000; or
- (b) in the case of a secondary-school board, by \$83,000, but the percentage rate shall be not less than zero.

AMOUNT OF GRANT

9.—(1) Subject to subsection 2, a board shall be paid a grant at its percentage rate of its total revenue fund expenditure less,

- (a) expenditure for,
 - (i) transportation of pupils to and from school,
 - (ii) board, lodging, and weekly transportation,
 - (iii) capital appurtenances,
 - (iv) debt charges,
 - (v) the pupil accommodation charge included in tuition fees payable to another board, and
 - (vi) tax adjustments; and
- (b) revenue fund revenue from sources other than from,
 - (i) general legislative grants,
 - (ii) taxes, including subscriptions in lieu of taxes and trailer fees,
 - (iii) the pupil accommodation charge included in fees receivable from another board, from the Minister, or from Canada,
 - (iv) disposal of capital appurtenances, and
 - (v) insurance proceeds in respect of capital appurtenances,

that is not in excess of the product of the average daily enrolment of resident-internal and resident-external pupils, adjusted by the application of the appropriate weighting factors, and

- (c) in the case of an elementary-school pupil \$450; or
- (d) in the case of a secondary-school pupil \$700.

(2) Subject to subsection 3, the grant provided by subsection 1 shall be paid on an estimated basis during the year in which the expenditure is incurred by the use of the estimated expenditure for the current year that is not in excess of the product of the enrolment of resident-internal and resident-external pupils, adjusted by the application of the appropriate weighting factors, on the last school-day of September of the preceding year, and

- (a) in the case of an elementary-school pupil, \$450; or
- (b) in the case of a secondary-school pupil, \$700,

with such adjustment as may be required when the actual financial data and average daily enrolment, adjusted by the appropriate weighting factors, are available for the year in which the expenditure was incurred.

(3) Where a board operates a summer-school course in the current year, the enrolment on the last school-day of September of the preceding year shall, for the purposes of subsection 2, be increased by the quotient obtained by dividing the number determined with reference to subclause ii of clause 1 of section 1 in respect of the summer-school course by 200.

PART 2

GRANTS FOR EXTRAORDINARY EXPENDITURE

10. In this Part, financial data exclude revenue and expenditure on behalf of classes or schools for trainable retarded children.

11. For the purposes of this Regulation,

(1) "capital appurtenance" means,

- (a) schools;
- (b) additions to schools;
- (c) school sites;
- (d) additions to school sites;
- (e) alterations to schools;
- (f) renovation of schools;
- (g) buildings other than school buildings;
- (h) television receiving sets;
- (i) furniture and machinery or equipment except for the normal replacement of existing furniture, machinery or equipment;
- (j) the restoration of insured school property destroyed or damaged; and
- (k) buses for the transportation of pupils.

(2) "recognized extraordinary expenditure" means,

- (a) the portion approved by the Minister for grant purposes of,
 - (i) debt charges payable in the current year by a board or on its behalf by a municipal or a county council, and
 - (ii) debt charges paid by an elementary-school board or on its behalf by a municipal or a county council in 1963 in the case of a debenture issued before the 1st day of January, 1951, where the final debt charges were payable in the year preceding the current year,

in respect of debentures issued to finance the purchase of capital appurtenances;

- (b) the portion approved by the Minister for grant purposes of capital expenditure from the revenue fund in the current year for the purchase of capital appurtenances that is not in excess of the sum calculated at one mill in the dollar upon the assessment;
- (c) the portion approved by the Minister for grant purposes of expenditures made by a board in the current year

for the transportation of pupils to and from school except where the parent or guardian contributes, other than by taxation, to the cost of transportation;

(d) the portion of the expenditure for board, lodging, and transportation to school and return once each week made in the current year by a board in respect of a pupil that is not in excess of \$3.50 for each day of attendance as certified by the principal of the school that the pupil attends; and

(e) the product of the pupil accommodation charge and the average daily enrolment, adjusted by the application of the appropriate course weighting factors, of pupils whose fees are payable in the current year by the board;

less,

(f) the product of the pupil accommodation charge and the average daily enrolment, adjusted by the application of the appropriate course weighting factors, of pupils whose fees are receivable in the current year from another board, from the Minister or from Canada; and

(g) the portion of the revenue in the current year designated by the Minister as deductible for grant purposes resulting from,

(i) the sale or disposal of capital appurtenances, and

(ii) insurance proceeds in respect of capital appurtenances.

(3) "recognized extraordinary expenditure per pupil" means the integral quotient obtained by dividing the recognized extraordinary expenditure by the enrolment of resident-internal and resident-external pupils on the last school-day of September of the preceding year adjusted by the application of the appropriate course and location weighting factors.

(4) "extraordinary expenditure mill rate" means,

(a) for an elementary-school board, the rate, correct to five places of decimals, obtained by dividing by 50 the sum of,

(i) the product of .65 and the recognized extraordinary expenditure per pupil up to and including \$50, and

(ii) the product of .225 and the recognized extraordinary expenditure per pupil in excess of \$50, and

(b) for a secondary-school board, the rate, correct to five places of decimals, obtained by dividing by 65 the sum of,

(i) the product of .325 and the recognized extraordinary expenditure per pupil up to and including \$65, and

(ii) the product of .112 and the recognized extraordinary expenditure per pupil in excess of \$65.

AMOUNT OF GRANT

12.—(1) Subject to subsection 2, a board shall be paid an Extraordinary Expenditure Grant that is the excess of,

(a) the recognized extraordinary expenditure, over,

(b) the sum calculated at the extraordinary expenditure mill rate in the dollar upon the assessment.

(2) The grant provided by subsection 1 shall be paid on an estimated basis during the year in which the expenditure is incurred by the use of the estimated recognized extraordinary expenditure for the current year with such adjustment as may be required when the actual financial data are available.

13.—(1) In respect of a board that was in existence in 1968, there shall be calculated a grant that is the product of,

(a) the quotient obtained by dividing the Extraordinary Expenditure Grant receivable for 1968, excluding the portion that was calculated by use of a percentage rate that was in excess of the effective rate applicable to recognized extraordinary expenditure, by the recognized extraordinary expenditure used in the calculating of the 1968 grant, and

(b) the capital expenditure from the revenue fund in 1968 approved by the Minister for grant purposes, adjusted by the resident pupil factor used in the calculation of the 1968 grant.

(2) The grant provided by subsection 1 shall be paid, as the case may be, to

(a) the board that continues in existence in 1969; or

(b) the board that assumes jurisdiction in 1969 over the area of the board that was dissolved; or

(c) the boards that assume jurisdiction in 1969 over the area of the board that was dissolved, in the ratio that their component municipalities were responsible in the year 1968 for the requisition of the board that was dissolved.

14. The grant arising from a commitment made to a former board in a territorial district regarding assistance for the acquisition of class-room accommodation following the enlargement of its area or an agreement to provide education for a board that had ceased to operate its schools shall be calculated under the provisions of the regulation in existence for the year in which the commitment was made and be paid to the board that assumes jurisdiction in 1969 over the area of the board to which the commitment was made.

PART 3

SPECIAL GRANTS IN TERRITORIAL DISTRICTS

15. A divisional board in a territorial district whose area of jurisdiction includes territory that, immediately prior to the 1st day of January, 1969, did not form part of a secondary-school district shall be paid a grant of 67 per cent of the amount that the secondary-school ratepayers of such territory would be required to raise under sections 86 and 88 of *The Secondary Schools and Boards of Education Act* if this section did not apply and the grant under this section shall be applied by the board to reduce the requisition from such territory.

PART 4

GRANTS FOR TRAINABLE RETARDED CHILDREN

16. In this Part, financial data include revenue and expenditure on behalf of trainable retarded children only.

17.—(1) Subject to subsections 2 and 3, a board that operates classes or schools for trainable retarded children shall be paid,

(a) for ordinary expenditure approved by the Minister, a grant calculated by applying the rate that is the greater of,

(i) 80 per cent, and

(ii) the rate as set forth in section 8,

to the amount that is the revenue fund expenditure for the current year reduced by,

(iii) expenditure for,

a. transportation of pupils to and from school,

b. board, lodging and weekly transportation,

c. capital appurtenances,

d. debt charges,

e. the pupil accommodation charge included in tuition fees payable to another board, and

(iv) revenue fund revenue from tuition fees receivable other than the pupil accommodation charge included therein, and

(b) for extraordinary expenditure approved by the Minister, a grant calculated by applying the rate that is the greater of,

(i) 50 per cent, and

(ii) the effective rate, correct to two places of decimals, determined by multiplying the grant provided under section 12 by 100 and dividing that product by the recognized extraordinary expenditure provided in subsection 2 of section 11,

to the amount that is the sum of,

a. expenditure in the current year for capital appurtenances,

b. expenditure in the current year for transportation of pupils to and from school except where the parent or guardian contributes, other than by taxation, to the cost of transportation,

c. the portion of the expenditure for board, lodging and transportation to school and return once each week in the current year in respect of a pupil that is not in excess of \$4.50 for each day of attendance as certified by the principal of the school that the pupil attends, and

d. the product of the pupil accommodation charge and the average daily enrolment of trainable

retarded pupils whose fees are payable in the current year by the board,

less,

e. the pupil accommodation charge included in fees receivable from another board, from the Minister or from Canada.

(2) The grant provided by subsection 1 shall be paid on an estimated basis during the year in which the expenditure is incurred by the use of estimated expenditure with such adjustment as may be required when the actual financial data are available.

(3) For purposes of the grant payable for the year 1969 under subsection 1, the percentage rate applicable to expenditures for transportation of pupils to and from school and to expenditures for board, lodging and transportation to school and return once each week shall be not less than 80.

PART 5

BOARDS ON TAX-EXEMPT LAND

18.—(1) In the case of a board appointed under subsection 1 of section 12 of *The Public Schools Act*, or under subsection 5 of section 12 or subsection 4a of section 51 of *The Secondary Schools and Boards of Education Act*, "cost of operating" means the total expenditure from the revenue fund during the current year for the operation of a school under the jurisdiction of the Board, expenditures for transportation approved by the Minister for grant purposes, expenditures for tuition fees to another board and approved expenditures for board, lodging, and weekly transportation, less capital expenditures, expenditures for rent and less revenue from sources other than from the organization for which the board was established, from general legislative grants and refunds of expenditure no part of which is eligible for grant.

(2) The board so appointed shall be paid a grant of 50 per cent of the estimated cost of operating as defined in subsection 1, but, where the board operates a school in a sanatorium, a hospital or a centre for the treatment of cerebral palsy, the grant shall be 80 per cent of the estimated expenditure for instructional salaries, 50 per cent of the estimated expenditure for tuition fees payable to another board, for transportation approved by the Minister for grant purposes and for approved expenditures for board, lodging and weekly transportation, with such adjustment as may be required when the actual financial data are available.

PART 6

ADJUSTMENT OF 1968 ENROLMENT GROWTH GRANT

19.—(1) In this Part,

(a) "average daily enrolment" means the average daily enrolment of resident-internal pupils and resident-external pupils;

(b) "board" does not include a board whose grant was calculated in 1968 under the special provisions for newly-established boards or a board that was established under the provisions of subsection 1 of section 12 of *The Public Schools Act* or under subsection 5 of section 12 or subsection 4a of section 51 of *The Secondary Schools and Boards of Education Act*.

(2) Where the excess of the 1968 average daily enrolment over the 1967 average daily enrolment was less than,

- (a) 30 for an elementary-school board where the 1967 average daily enrolment was under 600;
- (b) 5 per cent of the 1967 average daily enrolment for an elementary-school board where the 1967 average daily enrolment was 600 or more; or
- (c) 10 per cent of the 1967 average daily enrolment for a secondary-school board,

the amount of the Enrolment Growth Grant paid for 1968 shall be recovered from the general legislative grant payable on behalf of the board in 1969.

(3) Where the excess of the 1968 average daily enrolment over the 1967 average daily enrolment was,

- (a) 30 or more for an elementary-school board where the 1967 average daily enrolment was under 600;
- (b) 5 or more per cent of the 1967 average daily enrolment for an elementary-school board where the 1967 average daily enrolment was 600 or more; or
- (c) 10 or more per cent of the 1967 average daily enrolment for a secondary-school board where the 1967 average daily enrolment was 400 or more,

and where there was a difference between the average daily enrolment for 1968 and that estimated for 1968, the overpayment or underpayment, as the case may be, of the Enrolment Growth Grant paid in 1968 shall be added to or recovered from the general legislative grant payable on behalf of the board in 1969.

PART 7

LIMITATION OF GRANTS

20. The grant receivable by a board for 1969 provided under Parts 1 and 2 shall be not less than 104 per cent of and not greater than 110 per cent of the product of,

- (a) the 1969 average daily enrolment of resident-internal and resident-external pupils other than trainable retarded pupils, and
- (b) the quotient obtained by dividing,
 - (i) the general legislative grant, before adjustment in respect of the 1967 Attendance Growth Grant and after adjustment in 1969 in respect of the 1968 Enrolment Growth Grant, receivable for 1968 on behalf of the area that in 1969 comprises the area of jurisdiction of the board, exclusive of the grant for evening courses of study and lump-sum grants in connection with the construction of class-room accommodation under the provisions of either an order-in-council or the special assistance for boards in the territorial districts,
 by,
 - (ii) the 1968 average daily enrolment of resident-internal and resident-external pupils.

Application to Parliament

THE CORPORATION OF THE BOROUGH OF EAST YORK

NOTICE IS HEREBY GIVEN that The Corporation of the Borough of East York will apply to the Legislative Assembly of the Province of Ontario at its session commencing on or about the 19th day of November, 1968, for an Act to authorize the Council of the said Corporation to pass by-laws,

- (a) defining "non-residential property" for the purpose of any such by-law;
- (b) fixing a standard of fitness to which all non-residential property shall conform;
- (c) requiring the owners of non-residential property that does not conform to the standard to make it so conform;

- (d) requiring the owners of buildings, structures or erections that form part of non-residential property and that do not conform to the standard to demolish all or any part thereof;
- (e) prohibiting the use of non-residential property that does not conform to the standard;
- (f) authorizing the placarding in such manner as the by-law may specify of non-residential property that does not conform to the standard, and prohibiting the pulling down or defacing of any such placard;
- (g) governing and regulating persons in the use and occupancy of non-residential property; and
- (h) providing for the appointment of a tribunal of inspectors, or both a tribunal and inspectors, for the administration and enforcement of the by-laws.

Dated at East York this 15th day of November, 1968.

REGULATION MADE UNDER
THE PENSION BENEFITS ACT, 1965

1. Section 2 of Ontario Regulation 103/66 is amended by adding thereto the following subsection:

- (5a) Notwithstanding the terms of a pension plan where additional pension benefits are created on or after the 1st day of January, 1965 with respect to service prior to the date of an amendment to the pension plan or the establishment of the pension plan and such additional pension benefits are being funded by means of special payments, the administrator of the pension plan shall not, after the 1st day of January, 1969, transfer or withdraw funds from the pension fund to purchase annuities for retired, retiring or terminating members or other beneficiaries with respect to such additional pension benefits except to the extent that the aggregate amount of such

funds transferred or withdrawn from the pension fund does not exceed the aggregate of the special payments made and the accruals thereon in respect of such additional pension benefits plus any surplus in the fund.

2. Section 4 of Ontario Regulation 103/66 is revoked and the following substituted therefor:

- 4.—(1) The employer in respect of a registered pension plan shall cause the plan to be reviewed and a report prepared by a person authorized by section 5 not more than three years after the 1st day of January, 1965, or the date of the establishment of the plan and at intervals of not more than three years thereafter.
- (2) The report shall certify,
- (a) the estimated cost of benefits in respect of service in the next succeeding year and the rule for computing such cost in subsequent years up to the date of the next report;
 - (b) the surplus or the experience deficiency in the pension plan after making allowance for the present value of all special payments required to be made in the future by the employer as determined by previous reports; and
 - (c) the special payments which will liquidate any such experience deficiency over a term not exceeding five years.
- (3) The employer shall file the report with the Commission upon its receipt together with such additional information as the Commission requires.
- (4) Where the Commission is not satisfied that the report has been prepared in conformity with generally accepted principles of sound actuarial practice, the report shall be amended so as to be acceptable to the Commission.

3. Section 11 of Ontario Regulation 103/66, as amended by section 1 of Ontario Regulation 148/67, is revoked and the following substituted therefor:

- 11.—(1) Notwithstanding the terms of the plan, where a pension plan is terminated or wound-up, no part of the assets of the plan shall revert to the benefit of the employer until provision has been made for all pensions and other benefits in respect of service up to the date of such termination or winding-up to members of the plan and for all benefits to former employees, pensioners, dependants and estates, and the provisions of section 14 shall apply to any funds held for the purpose of effecting such provision.
- (2) Except as provided in subsection 3, suspension or cessation of contributions to a pension plan shall be construed as a termination of the plan.
- (3) Where contributions to a pension plan cease on or after the 1st day of January, 1965, as the result of the adoption of a new plan, the original pension plan shall be deemed not to have been terminated or wound-up under this section or under subsection 7 of section 21 of the Act and the benefits of the original plan shall be deemed to be benefits associated with the new plan in whole or in part in respect of service prior to the establishment of the new plan, whether or not the assets and liabilities of the original plan have been consolidated with those of the new plan.

- (4) Upon the termination or winding-up of a pension plan the administrator of the plan shall file with the Commission a report prepared by an actuary setting out the nature of the benefits to be provided under the plan and a description of the methods of allocation and priorities for determining the full or partial benefits of the members thereof, and no assets of the plan shall be applied toward the provision of any such benefits until the Commission has approved the said report, provided that, pending such approval, the administrator of the plan may pay as they fall due any periodic payments to persons entitled thereto and may pay any refunds of the employee contributions to persons entitled thereto.
- (5) For the purposes of subsection 7 of section 21 of the Act the actuary shall in his report prepared under subsection 4 reduce the amounts of the additional pension benefits to which any person may otherwise be entitled to such extent as will in his opinion prevent unfair impairment of the other pension benefits accrued under the plan, provided that the aggregate value of any additional pension benefits already paid and proposed to be paid after such reduction, to the extent that such additional pension benefits form part of deferred life annuities provided for in section 21 of the Act or of any life annuities arising therefrom, shall be not less than the value, as estimated by the actuary, of the special payments made in respect of the additional pension benefits forming such part.
- (6) Where a pension plan is terminated or wound-up in part, the rights and interests of those employees and former employees thereby affected shall be not less than those to which such employees and former employees would have been entitled if the whole of the pension plan had been terminated or wound-up on the same date as such partial termination or winding-up.

THE APPRENTICESHIP AND TRADESMEN'S QUALIFICATION ACT, 1964

O. Reg. 93/69.

Fuel and Electrical Systems Mechanic.

Made—December 19th, 1968.

Filed—March 20th, 1969.

REGULATION MADE UNDER THE APPRENTICESHIP AND TRADESMEN'S QUALIFICATION ACT, 1964

FUEL AND ELECTRICAL SYSTEMS MECHANIC

1. In this Regulation,

- (a) "certified trade" means the trade of fuel and electrical systems mechanic;
 - (b) "fuel and electrical systems mechanic" means a person engaged in the repair and maintenance of motor vehicles who,
 - (i) repairs and adjusts fuel systems,
 - (ii) installs, repairs and removes ignition systems, generators, alternators, starters, coils, panel instruments, wiring and other electrical systems and equipment,
 - (iii) performs a complete tune-up of an engine, and
 - (iv) installs, inspects, maintains and removes motor vehicle air-conditioning systems;
 - (c) "motor vehicle" means a vehicle propelled by an internal combustion engine, or a vehicle operated or controlled from a vehicle propelled by an internal combustion engine, that is registered for use on a highway under *The Highway Traffic Act* and is used primarily for the transport of persons, equipment or goods but does not include a vehicle,
 - (i) operated only on rails,
 - (ii) used for transportation solely within an employer's actual place of business, or
 - (iii) used for farming operations but not used for carrying a load.
2. A fuel and electrical systems mechanic may also,
- (a) repair, change and balance wheels and tires;
 - (b) change oil in motor vehicles or lubricate motor vehicles including lubricating the front wheel bearings and drive shaft;
 - (c) supply motor vehicles with anti-freezing solutions;
 - (d) replace cooling-system hoses, engine-driven belts, and thermostats; and
 - (e) perform any other duties normally performed by a service station attendant.

3. The trade of fuel and electrical systems mechanic is designated as a certified trade for the purposes of the Act.

4. An apprentice training programme for the certified trade is established and shall consist of,

- (a) training and instruction at full-time educational day classes provided at a College of Applied Arts and Technology or in classes that, in the opinion of the Director, are equivalent thereto; and
- (b) in practical training and instruction provided by an employer of the apprentice,

in the subjects contained in Parts 1 and 2 of the Schedule.

5.—(1) Subject to subsections 2 and 3, an apprentice shall complete three periods of training and instruction of 1800 hours per period.

(2) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma or has Ontario Grade 12 standing in English, Mathematics and Science or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete three periods of training and instruction of 1600 hours per period.

(3) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma majoring in auto mechanics or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete three periods of training and instruction of 1200 hours per period.

6. Any person who,

- (a) applies in the prescribed form for apprenticeship in the certified trade; and
- (b) becomes an apprentice in the certified trade within three months after commencing to work in that trade,

is exempt from subsection 2 of section 10 of the Act.

7. The rate of wages for an apprentice in the certified trade whether for his regular daily hours or for hours in excess of his regular daily hours shall not be less than,

- (a) 50 per cent during the first period of training and instruction;
- (b) 70 per cent during the second period of training and instruction; and
- (c) 90 per cent during the third period of training and instruction,

of the average rate of wages for journeymen employed by the employer in that trade, or where the employer is the only journeyman employed, of the average rate of wages for journeymen in the area.

8. The subjects of examination for an apprentice are the subjects set out in Parts 1 and 2 of the Schedule.

9. A certificate of qualification expires on the 31st day of October in each year.

FUEL AND ELECTRICAL SYSTEMS MECHANIC
PART 1
In-School Training

ITEM	COLUMN 1	COLUMN 2	COLUMN 3
	Course	Subject	Instruction To Be Given
1	Mathematics	Arithmetic	Addition, subtraction and division of whole numbers and fractions, ratio and proportion, areas and volumes.
		Geometry	Lines, planes and angles.
2	Science	Physics Mechanics }	Basic laws and principles, formulae. (Given as required in shop instruction.)
3	English	Basic Usage and Business Communications	Trade terminology and usage. Letter and report writing. Work and parts orders. Interpretation and use of manufacturers' manuals.
4	Drafting	Basic Drafting and Interpretation	Preparation of elementary working drawings and dimensioned sketches of automotive components. Interpretation of exploded drawings, electrical and hydraulic circuits and schematics used in manufacturers' manuals.
5	General Shop Practice	Safety	Safety rules and safe operating procedures. First aid. Fire prevention. Use and maintenance of fire-fighting equipment. Handling of gasoline, oils and cleaning solvents. Danger of carbon monoxide fumes. Correct use of lifting and hoisting equipment. Good housekeeping.
		Hand Tools	Selection and use of hammers, punches, chisels, pliers, wrenches, sockets, screwdrivers, hacksaws, files, drifts, scrapers, snips, clamps, drill bits, reamers, vises, taps and dies. Stud extractors. Hones.
		Power Tools	Use and care of portable air and electric drills, impact tools.
		Benchwork	Cutting with hacksaw, filing, scraping, drilling, use of drill press. Use of bench grinder; grinding of drill bits, chisels, etc. Fitting bushings, honing, cutting and flaring tubing. Soldering, gasket making. Oxy-acetylene and arc welding and cutting. Brazing techniques. Care and maintenance of welding equipment.
		Measuring Instruments	Use of rules, straight edges and squares. Feeler gauges, calipers, verniers, micrometers, telescopic gauges, dial indicators and pressure gauges.
		Fastening Devices	Purpose and types of bolts, nuts, studs, screws and tube fittings. Thread identification and classification. Tensile strengths. Installation procedures. Tightening torques. Cutting internal and external threads. Removing broken studs. "Heli-Coil" inserts. Purpose and types of rivets, keys, springs, flat and lock washers, snap rings, circlips, cotter pins. Installation and removal. Thread lubricants, sealers and locking compounds.
		General Shop Equipment	Capacities and correct usage of floor cranes, hoists, jacks, stands, hydraulic presses, pullers. Operation and maintenance of degreasing and steamcleaning equipment. Operation and maintenance of air compressors. Capacities and use of tow trucks and related vehicle recovery equipment.

6	Internal Combustion Engines	Principles, Types and Definitions	Principles of operation. 2 and 4 stroke cycles. Engine types—single and multi-cylinder, in-line, slanted, "V" types, flat or pancake. Definition of bore, stroke, combustion, piston displacement, clearance volume, swept volume, compression ratios and pressures, horsepower, torque. Engine formulae. Heat transfer. Combustion chamber design and efficiency.
		Engine Components	Types, purpose and function of major engine components: Cylinder blocks. Pistons, connecting rod and crankshaft assemblies. Bearings. Cylinder heads, valves and valve trains. Gaskets. Manifolds. Flywheels. Effects of cylinder wear and defective valves, etc., on engine performance. Valve timing. Torquing procedures. Engine testing. Vacuum and compression tests. Valve lash.
		Types and Classification of Lubricants	Characteristics of lubricants: Detergent, non-detergent, S.A.E. viscosity ratings, A.P.I. classification. Additives. Oil contamination and deterioration.
		Lubricating Systems	Types of engine lubricating systems, pumps, screens and filters; full-flow and by-pass types. Pressure indication and control. Crankcase ventilation. Servicing and overhaul procedures.
		Cooling Systems	Air and liquid cooled systems. Blowers, water pumps, fans and drives. Radiators. Thermostats. Hoses and connections. Temperature indicators. Automatic transmission coolers. Pressurized systems. Coolant, additives, sealers and antifreeze. Cleaning agents. Reverse flushing. Radiator flow testing. Immersion heaters. System repair and overhaul procedures.
		Fuel Systems (Gasoline)	Mechanical fuel/vacuum and electric pumps. Pressure, volume and vacuum tests. Tanks and supply lines. Repair and overhaul procedures. Carburetion; Fuel/air ratio. Characteristics of carburetors. Single, double and 4-barrel types. Up-draft, side and down draft, etc. Carburetor operation; atomization, vapourization, weight of fuel and air, venturi. Carburetor circuits and systems. Float, choke, idle, main-metering, power and accelerating circuits. Heat riser valves, heat insulators and choke tubes. Cleaning and overhaul procedures. Cleaning solvents. Effects of carburetor adjustments on engine performance. Tachometer and vacuum gauges. Effects of percolation, altitude and atmospheric changes, valve overlap and excess heat, incorrect float level. Balancing multi-carburetors. Adjustments to electrical mechanisms, switches, operating linkage. Effect on automatic transmission operation. Locating excess vacuum leaks. Torquing intake manifolds. Effect of air cleaners on engine performance. Analyzing exhaust gases. Relationship between air fuel mixture and exhaust gas. Tune-up procedures. Testing, maintaining and replacing positive crankcase ventilation systems, dash pots, throttle return checks, anti-stall devices.
		Fuel Injection Systems	Characteristics and operation of fuel injection systems, injectors and pumps. Governors. Fuel filters. Servicing and overhauling fuel injection systems. Test equipment and test procedures. Cleanliness. Fuel injection timing. Air induction systems. Starting systems. Shutting down runaway engines.
		Fuel Systems (Liquified Petroleum Gas and Vaporizing Oils)	Use and operation of L.P.G. systems. Charging L.P.G. tanks. Principles of operation using vaporizing oils.

7	Belt Drives	“V” Belt Installation	Characteristics of “V” Belts. Inspecting, installing and adjusting.
8	Exhaust Systems	Mufflers, Resonators, Exhaust and Tail Pipes	Features of exhaust systems, single dual and resonators with mufflers. Dual exhaust systems, cross-over pipes and heat riser passages. Back pressure checks. Emission control systems; inspection and servicing. Characteristics of insulators, hangers, brackets and clamps. Replacing complete exhaust systems or parts. Expansion and contraction. Stress relieving of system. Exhaust gas leaks.
9	Electrical Systems	Basic Electricity	Definition of amperes, voltage, resistance, Ohm’s Law. Electron flow. Electro-magnetism. Series and parallel circuits. Voltage drop. Use of voltmeter, ammeter and ohmmeter. Conductors and insulators.
		Automotive Electrical Circuits	Characteristics of typical circuits. Voltages and currents. Ground circuits. Automotive wire and cables. Insulation materials. Flexibility. Resistance. Joining, splicing and soldering of wires and cables. Insulating. Removal and installation of terminals, connectors and plugs. Effects of temperature, shorts, grounds, poor connections. Resistances and fuses. Identification and tracing of circuits.
		Switches and Instruments	Function of automotive electrical switches, relays and instruments. Indicator lights. Rheostats, resistors, capacitors and semi-conductors. Test, repair and replacement procedures.
		Batteries	Principles, characteristics and function of lead acid batteries. Electro-chemical action. Electrolyte. Voltage developed. Ampere hour ratings. Sulfation. Inspection, testing and maintenance. Use of voltmeters, ammeters, load resistances and hydrometers. Battery charging. Charging rates. Charging and handling hazards. Dry-charged batteries. Activation procedures.
		Ignition Systems (Conventional Distributors)	Function, mounting and driving of distributors. Single, tandem, double headed, dual contact points, impulse generators for semi-conductor systems etc. Internal electrical circuits. Cam lobes, single and double contact points, dwell angle, condensers. Centrifugal and vacuum advance. Secondary voltage distribution. Radio suppression. Ignition timing. Distributor tests on and off vehicle. Distributor inspection and overhaul procedures. Replacement of shafts and bushings; contact point cleaning, replacement and adjustment, alignment and spring tension, gap-dwell settings; lubrication of cams, pivots and advance mechanisms. Installation and timing. Synchronizing dual points and distributors. Engine speed settings.
		Ignition Coils	Characteristics and function. Coil polarity, secondary voltage range, internal and external resistors, temperature effects. Saturation period and coil output. Coil Testing equipment; output, insulation and polarity tests.
		Primary Circuit Switches and Resistors	Characteristics. Safety features—automatic transmission and theft protection. By-passing primary circuit resistance for starting.
		Primary and Secondary Circuits	Testing primary and secondary circuits. Effects of suppression equipment on tests. Arcing corrosion. Replacement of primary and high tension wiring.

9		Transistor and Transistorized Ignition Systems	Characteristics and application of diodes and transistors used in automotive ignition systems. Transistor and transistorized systems. Fundamentals of operation. Timing procedures. Test equipment. Testing and repair procedures.
		Spark Plugs	Characteristics and operation. Ionization, negative polarity, temperature control and heat ranges. Radio suppression. Analyzing deposits. Testing, cleaning, filing, setting and installing. Tightening torques.
		D. C. Charging Systems (Generators)	Characteristics. Internally and externally grounded fields. Positive and negative grounded systems. Generator construction. Principles of generator operation. Electro-magnetic induction. Electrical and magnetic circuits. Commutation.
		Regulators	Construction features. 2 and 3 unit, double contact, heavy duty and carbon pile regulators. Principles of operation. Voltage and current regulation; cut-out relays. Temperature compensation.
		A. C. Charging Systems (Alternators)	Characteristics. Internally and externally grounded fields. Positive and negative ground systems. Internally and externally grounded systems. Alternator construction. Principles of operation. Electromagnetic induction. Electrical circuits ("Y" and delta). Magnetic circuits. Rectification. Current limitation. A.C. regulators and relays; Vibrating contact, transistorized, transistor types. Principles of regulator and relay operation. Voltage regulators, field relays, indicator light relays. Temperature compensation.
		Inspection, Testing, and Repair	Inspection, and test procedures for generators, alternators, regulators, relays, wiring and ground circuitry. On and off vehicle tests. Removing, disassembling, cleaning, overhauling, testing and re-installing generators, alternators, regulators and relays. Cleaning agents. Lubricants. Polarizing generator. Contact cleaning, replacing and adjusting. Air gap adjustments. Replacing transistors and diodes. Bench testing and adjustment of regulators and relays.
		Starter Motors	Characteristics. Construction features. Principles of operation. Electro-magnetism. Electric circuits, magnetic circuits. Series and compound cranking motors. Commutation. Operation of starter motor drive units. Bendix, Dyer, over-running clutch, etc. Flywheel ring gears. Operation of motor solenoids and switches. Solenoid circuits. Neutral safety switch. Inspecting and testing starting circuits; motors, solenoids, cables and wiring. Removing, dis-assembling, cleaning, overhauling, testing and re-installing. Cleaning agents. Lubricants. Testing and servicing component parts of motor.
		Special Starting Systems	Operating principles. Series parallel switches. Series parallel and magnetic switch systems. Diesel fuel preheating systems (Glow Plugs). Testing, repairing or replacing components.
		Lights	Type and characteristics of lights. Rating of bulbs and seal beam units. Candle power, and wattage. Lenses and holders. Signal lights; flasher units, radio interference. Series and parallel circuits. Circuit fuses. Ground circuits. Aiming, testing, installing and repairing lights.

9		Horns	Characteristics. Electric and air/vacuum types. Horn operation. Electrical circuits and relays. Amperage draw. Air/vacuum horn controls. Fuses. Inspecting and adjusting horns.
		Electric Windshield Wipers	Characteristics and operation; electric single and multi-speed and vacuum types. Drives and linkage. Arms and blades. Speed control. Fuses. Washer cycling. Overhaul and repair procedures. Replacing and adjusting wiper blades and arms.
		Windshield Washers	Characteristics. Automatic operation and cycling. Manual operation. Installing, repairing or replacing windshield washers and controls. Aiming fluid nozzles.
		Power-Assist Systems	Characteristics of electrical and electro-hydraulic power assist mechanisms and circuits. Windows, tailgates, convertible tops, seats, etc. Inspection, servicing and overhaul.
		Heaters and Defrosters	Types, characteristics and operation. Component features. Methods of testing, adjustment or replacement of blower motors, actuating and control systems.
10	Air-Conditioning and Refrigeration Systems	Refrigeration Principles	Heat transfer; conduction, convection, radiation. British thermal units. Latent heat of vaporization; effects of liquid change to vapor and vapor to liquid. Effects of pressure on boiling point and condensation. Refrigerant. The basic refrigeration system. Air induction and condensation removal systems.
		System Components	Types, characteristics and operation. Drive units, compressors and clutch drives, condensers, receivers, expansion valves, evaporators, control valves, thermostatic controls, blowers, electrical circuits. Refrigerant (Freon - 12), refrigeration oils, pressure lines and fittings.
		Inspection and Maintenance	Safety precautions and correct use of safety equipment. Inspection, testing, adjustment, overhaul and replacement procedures. Use of gauges and test equipment. Importance of exercising system. Oil level checks and replenishment procedures. Testing for leaks. Purging, evacuating and re-charging procedures. Procedures for installation and removal of motor vehicle air-conditioning and refrigeration systems.
11	Lubrication	Types and Classification of Lubricants	Identification, properties and characteristics of oils: Heavy duty (detergent), regular (non-detergent). S.A.E. viscosity ratings. A.P.I. classifications. Other types of oils and greases. Additives. Frequency of change intervals.
		Engine Lubricating Systems	Function. Lubricant feeds, oil pumps, pressure control. Inspection procedures. Detection of leaks. By-pass and full-flow oil filters; maintenance and replacement. Flushing lubricating systems. Correct levels. Positive crankcase ventilation systems; inspection, testing and servicing.
		Open Drive Shafts	Characteristics; support bearings, universal joints, slip joints. Lubrication and sealing. Dis-assembly, re-lubing, re-assembly and re-installation. Torquing universal trunnions.
		Driving Axles and Differentials	Characteristics; gears and bearings. Oil sealing and venting. Lubricants. Filling and checking oil levels.

		Suspension Systems	Lubricating suspension components and friction proofing spring leafs. Sealed systems.
		Steering Systems A (Manual)	Characteristics of steering box gearing. Lubricants. Filling and checking levels.
		B (Power)	Characteristics of power steering systems. Oil seals and vents. Types of fluid, capacities. Filling and checking system levels.
		C (Linkages)	Characteristics; bushings and joints. Methods of sealing and lubricating movable steering joints. Sealed systems.
		Front Wheel Bearings	Types and characteristics. Lubrication; adjusting or torquing. Replacing oil seals.
		Generators, Alternators, Starters	Types and characteristics of bearings used. Bushes, ball bearings; lubricated and prepacked lubricant type. Correct type and amount of lubricant where necessary.
		Miscellaneous Linkage and Cables	Throttle, clutch, gearshift, and emergency brake linkage. Lubricant and lubrication methods where necessary.
		Carburetor Air Cleaners	Types and characteristics of air cleaners and filters. Inspection, maintenance and replacement.
		Lubrication Certification	Certification of lubricant and filter changes and re-lubing of bearings and components. Extended warranties.
	Wheels and Tires	Wheels and Rims	Types and characteristics; single and dual. Removal and installation. Wheel wrenches. Wheel to hub fastening and locating devices. Handling heavy wheels and tires. Inspecting and servicing. Run-out.
		Tires, Tubes and Valves	Types, sizes, characteristics and application. De-mounting and mounting. Equipment and lubricants. Repairing tires, tubes and valves. Tire inflation precautions. Inspection for damage, wear and faults. Tire rotation. Retreads.
		Balancing Wheels and Tires	Wheel balancing equipment. Balancing wheels and related parts. Static and dynamic balance. Weight installation.
	Running Maintenance Inspections	Inspection Procedure	Development of quick visual checking procedures for excessive wear and looseness in steering linkage, components and wheel bearings. Buckled wheels, broken springs or leafs, weak shock absorbers and worn mountings. Defective clutch, service or emergency brake operation. Defective engine and transmission mountings. Worn or loose universal joints. Worn or defective tires, tubes and valves. Misalignment. Faults in exhaust systems. Defective lights, batteries and hold-downs, wiring and cables. Coolant, oil and fluid leaks. Deteriorated hoses, loose clamps, damaged lines. Loose or worn "V" belts. Defective windshield wipers and washers. 1	General Shop Practice	General	Safety rules and removal of all safety hazards. Use of hand and power tools, measuring instruments, fastening devices and general shop equipment. Benchwork operations. (As detailed in Part 1)
2	Internal Combustion Engines	Types, Components and Operation	Familiarization with engine types, components and correct operation. Recognition of abnormal engine noises and causes. Vacuum and compression testing. Identification of effects of cylinder wear, defective valves and gaskets and incorrect valve timing on engine performance. Torquing heads and manifolds. Adjusting valve lash.
		Lubricants	Familiarization with lubricant characteristics, classifications and ratings; contamination and deterioration, frequency of change intervals.
		Lubricating Systems	Familiarization with types, operation and requirements. Servicing or replacement of full-flow and by-pass filters. Testing, servicing and adjustment of pressure indicators and controls and positive crankcase ventilation systems.
		Cooling Systems	Air and liquid cooled pressurized systems. Inspection, testing, overhaul or replacement of blowers, fans, water pumps, drives, radiators and caps, thermostats, hoses and connections, temperature indicators, immersion and hot water heaters, automatic transmission oil coolers. Radiator reverse flushing and flow-testing; use of cleaning agents, coolant additives, sealers. Testing anti-freeze solutions.
		Fuel Systems (Gasoline)	Mechanical fuel/vacuum and electric pumps. Tests for pressure, vacuum and volume. Repair, overhaul or replacement of pumps, tanks and supply lines. Familiarization with principles of carburetion and characteristics of carburetors, types, operation, circuits and systems; heat riser valves, heat insulators, choke tubes, dash pots, throttle return checks, anti-stall devices and air cleaners. Testing, adjusting, cleaning and overhaul procedures.
		Tune-Up and Test Procedures	Use of electrical analyzers, vacuum gauges, tachometers and timing lights to adjust idle speeds and mixtures, analyze exhaust gases, locate excess vacuum leaks, balance multi-carburetors, check and correct ignition timing and operation, adjust electrical mechanisms, switches and operating linkage. Dynamometer testing to determine engine horsepower and torque output.
		Fuel Injection Systems	Servicing and overhauling fuel injection systems. Test equipment and testing operations. Injection timing. Servicing and overhauling starting systems. Shutting down runaway engines.
3	Belt Drives	Fuel Systems (Liquified Petroleum Gas and Vaporizing Oils)	Use and operation of liquified petroleum gas and vaporizing oil systems. Charging L.P.G. tanks.

THE APPRENTICESHIP AND TRADESMEN'S
QUALIFICATION ACT, 1964

O. Reg. 94/69.
Motor Vehicle Mechanic.
Made—December 19, 1968.
Filed—March 20th, 1969.

REGULATION MADE UNDER
THE APPRENTICESHIP AND TRADESMEN'S
QUALIFICATION ACT, 1964

MOTOR VEHICLE MECHANIC

1. In this Regulation,

- (a) "certified trade" means the trade of motor vehicle mechanic;
- (b) "motor vehicle" means a vehicle propelled by an internal combustion engine, or a vehicle operated or controlled from a vehicle propelled by an internal combustion engine, that is registered for use on a highway under *The Highway Traffic Act* and is used primarily for the transport of persons, equipment or goods, but does not include a vehicle,
 - (i) operated only on rails,
 - (ii) used for transportation solely within an employer's actual place of business, or
 - (iii) used for farming operations but not used for carrying a load;
- (c) "motor vehicle mechanic" means a person engaged in the repair and maintenance of motor vehicles who,
 - (i) disassembles, adjusts, repairs and re-assembles engines, transmissions, clutches, rear ends, differentials, brakes, drive shafts, axles and other assemblies,
 - (ii) tests for and corrects faulty alignment of wheels and steering mechanisms, manual or power,
 - (iii) repairs or replaces suspension systems including shock absorbers and spring assemblies,

- (iv) installs, repairs and removes ignition systems, generators, alternators, starters, coils, panel instruments, wiring and other electrical systems and equipment,
- (v) repairs and adjusts fuel systems,
- (vi) performs complete engine tune-ups, and
- (vii) installs, inspects, maintains and removes motor vehicle air-conditioning and refrigeration systems;

(d) "related motive power trade" means a trade related to the trade of motor vehicle mechanic, and includes the trades of alignment and brakes mechanic, fuel and electrical systems mechanic, transmission mechanic, heavy duty equipment mechanic, auto body repairer, truck-trailer repairer, service station attendant, automotive machinist, automotive painter and motorcycle mechanic.

2. A motor vehicle mechanic may also,

- (a) repair, change and balance wheels and tires;
- (b) change oil in motor vehicles or lubricate motor vehicles including lubricating the front wheel bearings and drive shaft;
- (c) supply motor vehicles with anti-freezing solutions;
- (d) replace cooling-system hoses, engine-driven belts, and thermostats;
- (e) clean or replace spark plugs;
- (f) install new or rental batteries or battery cables, or recharge batteries; and
- (g) perform any other duties normally performed by a service station attendant.

3. The trade of motor vehicle mechanic is designated as a certified trade for the purposes of the Act.

4. Notwithstanding anything in this Regulation, a person holding a certificate of qualification in a related motive power trade is not prohibited from performing the duties specified in the Regulation for that trade.

5. An apprentice training programme for the certified trade is established and shall consist of,

- (a) training and instruction at full-time educational day classes provided at a College of Applied Arts and Technology or in classes that, in the opinion of the Director, are equivalent thereto; and
- (b) practical training and instruction provided by an employer of the apprentice,

in the subjects contained in Parts 1 and 2 of the Schedule.

6.—(1) Subject to subsections 2 and 3, an apprentice shall complete five periods of training and instruction of 1800 hours per period.

(2) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma or has Ontario Grade 12 standing in English, Mathematics and Science or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete five periods of training and instruction of 1600 hours per period.

(3) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma majoring in auto mechanics or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete five periods of training and instruction of 1200 hours per period.

7. A person holding a certificate of qualification in a related motive power trade may qualify for examination for a certificate of qualification in the trade of motor vehicle mechanic by becoming indentured as an apprentice in the trade of motor vehicle mechanic and completing the following requirements:

1. A holder of a certificate of qualification in the trade of alignment and brakes mechanic shall complete the final three periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.
2. A holder of a certificate of qualification in the trade of automotive machinist shall complete the final two periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.
3. A holder of a certificate of qualification in the trade of fuel and electrical systems mechanic shall complete the final three periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.
4. A holder of a certificate of qualification in the trade of heavy duty equipment mechanic shall complete the final two periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.
5. A holder of a certificate of qualification in the trade of motorcycle mechanic shall complete the final three periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.
6. A holder of a certificate of qualification in the trade of transmission mechanic shall complete the final three periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.

7. A holder of a certificate of qualification in the trade of truck-trailer repairer shall complete the final three periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.

8. A holder of a certificate of qualification in the trade of service station attendant who,

- (a) has successfully completed Grade 8 in Ontario, or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, shall complete five periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule; or
- (b) has successfully completed Grade 10 in Ontario, or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, shall complete the final four periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.

8. Notwithstanding section 7, a holder of a certificate of qualification in the trade of heavy duty equipment mechanic may qualify for examination for a certificate of qualification in the trade of motor vehicle mechanic by submitting written evidence, satisfactory to the Director, of having had at least two years experience as a journeyman in the trade of motor vehicle mechanic.

9. Any person who,

- (a) applies in the prescribed form for apprenticeship in the certified trade; and
- (b) becomes an apprentice in the certified trade within three months after commencing to work in that trade,

is exempt from subsection 2 of section 10 of the Act.

10. The rate of wages for an apprentice in the certified trade whether for his regular daily hours or for hours in excess of his regular daily hours, shall not be less than,

- (a) 50 per cent during the first period of training and instruction;
- (b) 60 per cent during the second period of training and instruction;
- (c) 70 per cent during the third period of training and instruction;
- (d) 80 per cent during the fourth period of training and instruction; and
- (e) 90 per cent during the fifth period of training and instruction,

of the average rate of wages for journeymen employed by the employer in that trade, or where the employer is the only journeyman employed, of the average rate of wages for journeymen in the area.

11. The subjects of examination for an apprentice are the subjects set out in Parts 1 and 2 of the Schedule.

12. A certificate of qualification expires on the 31st day of October in each year.

13. Ontario Regulation 274/64 is revoked.

MOTOR VEHICLE MECHANIC
PART 1
In-School Training

ITEM	COLUMN 1	COLUMN 2	COLUMN 3
	Course	Subject	Instruction To Be Given
1	Mathematics	Arithmetic	Addition, subtraction and division of whole numbers and fractions, ratio and proportion, areas and volumes.
		Geometry	Lines, planes and angles.
2	Science	Physics	Basic laws and principles, formulae. (Given as required in shop instruction.)
3	English	Basic Usage and Business Communications	Trade terminology and usage. Letter and report writing. Work and parts orders. Interpretation and use of manufacturers' manuals.
4	Drafting	Basic Drafting and Interpretation	Preparation of elementary working drawings and dimensioned sketches of automotive components. Interpretation of exploded drawings, electrical and hydraulic circuits and schematics used in manufacturers' manuals.
5	General Shop Practice	Safety	Safety rules and safe operating procedures. First aid. Fire prevention. Use and maintenance of fire-fighting equipment. Handling of gasoline, oils and cleaning solvents. Danger of carbon monoxide fumes. Correct use of lifting and hoisting equipment. Good housekeeping.
		Hand Tools	Selection and use of hammers, punches, chisels, pliers, wrenches, sockets, screwdrivers, hacksaws, files, drifts, scrapers, snips, clamps, drill bits, reamers, vises, taps and dies. Stud extractors. Hones.
		Power Tools	Use and care of portable air and electric drills, impact tools, grinders, sanders.
		Benchwork	Cutting with hacksaw, filing, scraping, drilling, use of drill press. Use of bench grinder. Grinding of drill bits, chisels, etc. Fitting bearings, bushings; honing, cutting and flaring tubing. Soldering, gasket making. Oxy-acetylene and arc welding and cutting. Brazing techniques. Care and maintenance of welding equipment.
		Measuring Instruments	Use of rules, straight edges and squares. Feeler gauges, calipers, verniers, micrometers, telescopic gauges, dial indicators, trammel gauges, pressure gauges.
		Fastening Devices	Purpose and types of bolts, nuts, studs, screws and tube fittings. Thread identification and classification. Tensile strengths. Installation procedures. Tightening torques. Cutting internal and external threads. Removing broken studs. "Heli-Coil" inserts. Purpose and types of rivets, keys, springs, flat and lock washers, snap rings, circlips, cotter pins. Installation and removal. Thread lubricants, sealers and locking compounds.
		General Shop Equipment	Capacities and correct usage of floor cranes, hoists, jacks, stands, hydraulic presses, pullers. Power hacksaws. Operation and maintenance of degreasing and steamcleaning equipment. Operation and maintenance of air compressors. Capacities and use of tow trucks and related vehicle recovery equipment.

6	Internal Combustion Engines	Principles, Types and Definitions	Principles of operation. 2 and 4 stroke cycles. Engine types—single and multi-cylinder, in-line, slanted, "V" types, flat or pan-cake. Definition of bore, stroke, combustion, piston displacement, clearance volume, swept volume, compression ratios and pressures, horsepower, torque. Engine formulae. Heat transfer. Combustion chamber design and efficiency.
		Engine Components	Types and function of major engine components: cylinder blocks, cylinder heads, pistons and rings, wrist pins, connecting rods. Bearings, crankshafts, valves and guides, valve trains, camshafts, timing gears or chains, gaskets, manifolds, flywheels and ring gears. Vacuum and compression tests; valve lash. Dis-assembling, cleaning, inspecting, repair, reconditioning or replacement. Boring, honing, grinding and aligning operations. Re-assembly sequence for engines and components. Fits, clearances and tolerances. Torquing. Valve timing. Engine testing procedures.
		Types and Classification of Lubricants	Characteristics of lubricants: Detergent, non-detergent. S.A.E. viscosity ratings, A.P.I. classification. Additives. Oil contamination and deterioration.
		Lubricating Systems	Types of engine lubricating systems; wet sump, dry sump, fuel/oil mix, pressure, splash and dip feeds. Gear, plunger and vane type pumps; screens and filters; full-flow and by-pass types. Pressure indication and control. Crankcase ventilation. Servicing and overhaul procedures.
		Cooling Systems	Air and liquid cooled systems. Blowers, water pumps, fans and drives. Radiators. Thermostats. Hoses and connections. Temperature indicators. Automatic transmission coolers. Pressurized systems. Coolant, additives, sealers, and anti-freeze. Cleaning agents. Reverse flushing. Radiator flow testing. Immersion heaters. System repair and overhaul procedures.
		Fuel Systems (Gasoline)	Mechanical fuel/vacuum and electric pumps. Pressure, volume and vacuum tests. Tanks and supply lines. Repair and overhaul procedures. Carburetion; Fuel/air ratio. Characteristics of carburetors. Single, double and 4 barrel types. Up-draft, side and down draft, etc. Carburetor operation; atomization, vapourization, weight of fuel and air, venturi. Carburetor circuits and systems. Float, choke, idle, main-metering, power and accelerating circuits. Heat riser valves, heat insulators and choke tubes. Cleaning and overhaul procedures. Cleaning solvents. Effects of carburetor adjustments on engine performance. Tachometer and vacuum gauges. Effects of percolation, altitude and atmospheric changes, valve overlap and excess heat, incorrect float level. Balancing multi-carburetors. Adjustments to electrical mechanisms, switches, operating linkage. Effect on automatic transmission operation. Locating excess vacuum leaks. Torquing intake manifolds. Effect of air cleaners on engine performance. Analyzing exhaust gases. Relationship between air/fuel mixture and exhaust gas. Tune-up procedures. Testing and maintaining positive crankcase ventilation systems, dash pots, throttle return checks, anti-stall devices.

6		Fuel Injection Systems	Characteristics and operation of fuel injection systems, injectors and pumps. Governors. Fuel filters. Servicing and overhauling fuel injection systems. Test equipment and test procedures. Cleanliness. Fuel injection timing. Air induction systems. Starting systems. Shutting down runaway engines.
		Fuel Systems (Liquified Petroleum Gas and Vaporizing Oils)	Use and operation of L.P.G. systems. Charging L.P.G. tanks. Principles of operation using vaporizing oils.
7	Belt Drives	"V" Belt Installation	Characteristics of "V" Belts. Inspecting, installing and adjusting.
		Ignition Coils	Characteristics and function. Coil polarity, secondary voltage range, internal and external resistors, temperature effects. Saturation period and coil output. Coil Testing equipment; output, insulation and polarity tests.
		Primary Circuit Switches and Resistors	Characteristics. Safety features—automatic transmission and theft protection. By-passing primary circuit resistance for starting.
		Primary and Secondary Circuits	Testing primary and secondary circuits. Effects of suppression equipment on tests. Arcing corrosion. Replacing of primary and high tension wiring.
		Transistor and Transistorized Ignition Systems	Characteristics and application of diodes and transistors used in automotive ignition systems. Transistor and transistorized systems. Fundamentals of operation. Timing procedures. Test equipment. Testing and repair procedures.
		Spark Plugs	Characteristics and operation. Ionization, negative polarity, temperature control and heat ranges. Radio suppression. Analyzing deposits. Testing, cleaning, filing, setting and installing. Tightening torques.
		D.C. Charging Systems (Generators)	Characteristics. Internally and externally grounded fields. Positive and negative grounded systems. Generator construction. Principles of generator operation. Electro-magnetic induction. Electrical and magnetic circuits. Commutation.
		Regulators	Construction features. 2 and 3 unit, double contact, heavy duty and carbon pile regulators. Principles of operation. Voltage and current regulation; cut-out relays. Temperature compensation.
		A.C. Charging Systems (Alternators)	Characteristics. Internally and externally grounded fields. Positive and negative ground systems. Internally and externally ground systems. Alternator construction; principles of operation. Electro-magnetic induction. Electrical circuits ("Y" and delta). Magnetic circuits. Rectification. Current limitation. A.C. regulators and relays; vibrating contact, transistorized, transistor types. Principles of regulator and relay operation. Voltage regulators, field relays, indicator light relays. Temperature compensation.
8	Exhaust Systems	Mufflers, Resonators, Exhaust and Tail Pipes	Features of exhaust systems, single, dual and resonators with mufflers. Dual exhaust systems, cross-over pipes and heat riser passages. Back pressure checks. Emission control systems; Inspection and servicing. Characteristics of insulators, hangers, brackets and clamps. Replacing complete exhaust systems or parts. Expansion and contraction. Stress relieving of system. Exhaust gas leaks.

9	Electrical Systems	Basic Electricity	Definition of amperes, voltage, resistance, Ohm's Law. Electron flow. Electro-magnetism. Series and parallel circuits. Voltage drop. Use of voltmeter, ammeter and ohmmeter. Conductors and insulators.
		Automotive Electrical Circuits	Characteristics of typical circuits. Voltages and currents. Ground circuits. Automotive wire and cables. Insulation materials. Flexibility. Resistance. Joining, splicing and soldering of wires and cables. Insulating. Removal and installation of terminals, connectors and plugs. Effects of temperature, shorts, grounds, poor connections. Resistances and fuses. Identification and tracing of circuits.
		Switches and Instruments	Function of automotive electrical switches, relays and instruments. Indicator lights. Rheostats, resistors, capacitors and semi-conductors. Test, repair and replacement procedures.
		Batteries	Principles, characteristics and function of lead acid batteries. Electro-chemical action. Electrolyte. Voltage developed. Ampere hour ratings. Sulfation. Inspection, testing and maintenance. Use of voltmeters, ammeters, load resistances and hydrometers. Battery charging. Charging rates. Charging and handling hazards. Dry-charged batteries. Activation procedures.
		Ignition Systems (Conventional Distributors)	Function, mounting and driving of distributors. Single, tandem, double headed, dual contact points, impulse generators for semi-conductor systems, etc. Internal electrical circuits, Cam lobes, single and double contact points, dwell angle, condensers. Centrifugal and vacuum advance. Secondary voltage distribution. Radio suppression. Ignition timing; Distributor tests on and off vehicle. Distributor inspection and overhaul procedures. Replacement of shafts and bushings; contact point cleaning, replacement and adjustment, alignment and spring tension, gap-dwell settings; lubrication of cams, pivots and advance mechanisms. Installation and timing. Synchronizing dual points and distributors. Engine speed settings.
		Inspection, Testing, Repair and Overhaul	Inspection and test procedures for generators, alternators, regulators, relays, wiring and ground circuitry. On and off-vehicle tests. Removing, dis-assembling, cleaning, overhauling, testing and re-installing generators, alternators, regulators and relays. Cleaning agents. Lubricants. Polarizing generator. Contact cleaning, replacing and adjusting. Air gap adjustments. Replacing transistors and diodes. Bench testing and adjustment of regulators and relays.
		Starter Motors	Characteristics. Construction features. Principles of operation. Electro-magnetism. Electric circuits, magnetic circuits. Series and compound cranking motors. Commutation. Operation of starter motor drive units. Bendix, Dyer, over-running clutch, etc., Flywheel ring gears. Operation of motor solenoids and switches. Solenoid circuits. Neutral safety switch. Inspecting and testing starting circuits; motors, solenoids, cables and wiring. Removing, dis-assembling, cleaning, overhauling, testing and re-installing. Cleaning agents. Lubricants. Testing and servicing component parts of motor.

		Lights	Type and characteristics of lights. Rating of bulbs and seal beam units. Candle power, and wattage. Lenses and holders. Signal lights; flasher units, radio interference. Series and parallel circuits. Circuit fuses. Ground circuits. Aiming, testing, installing and repairing lights.
		Horns	Characteristics. Electric and air/vacuum types. Horn operation. Electrical circuits and relays. Amperage draw. Air/vacuum horn controls. Fuses. Inspecting and adjusting horns.
		Electric Windshield Wipers	Characteristics and operation; electric single and multi-speed and vacuum types. Drives and linkage. Arms and blades. Speed control. Fuses. Washer cycling. Overhaul and repair procedures. Replacing and adjusting wiper blades and arms.
		Windshield Washers	Characteristics. Automatic operation and cycling. Manual operation. Installing, repairing or replacing windshield washers and controls.
		Power-Assist Systems	Characteristics of electrical and electro-hydraulic power assist mechanisms and circuits. Windows, tail-gates, convertible tops, seats, etc. Inspection, servicing and overhaul.
		Heaters and Defrosters	Types, characteristics and operation. Component features. Testing, adjustment, or replacement of blower motors, actuating and control systems.
10	Power Trains	Clutches	Characteristics and construction features; single plate, multi-plate, etc. Function of controls: mechanical, hydraulic, vacuum, air and electrically operated. Adjustments. Removal, dis-assembly, inspection and overhaul of clutches and components. Cleaning methods. Assembly lubricants. Clutch re-installation. Aligning procedures. Control adjustment. Clearances. Testing.
		Standard Transmissions	Characteristics of spur gears, planetary gears (overdrives), synchronizing mechanisms, over-running clutches, dog clutches and internal shift mechanisms. Characteristics of manual shift transmissions (passenger vehicles, commercial vehicles), overdrive units and auxiliary transmissions. Gear ratios. Transmission control mechanisms; direct, remote and assist mechanisms. Servicing and adjusting. Lubrication. Oil sealing and venting. Removal of transmissions and controls. Construction features of transmission components. Overhauling transmissions, linkages and controls. Cleanliness. Inspection procedures. Serviceability of parts and components. Maintaining operating relationship of parts. Gear and spline fits. Re-installation and adjusting controls.
		Automatic Transmissions	Characteristics and construction features. Transmission cooling. Mechanical, electrical, vacuum operated controls. Principles of operation of planetary gears, friction clutches, over-running clutches, servos, bands and drums, fluid couplings and torque converters. Hydraulic components and circuits.

10			Transmission fluids. Draining, re-filling, and level checking procedures. Oil seals and vents. Shop test procedures; performance characteristics: shifting, non-shifting. Specifications. Band and linkage adjustments, control settings, checking external connections and fluid levels prior to tests. Effects of defective engines, related components and worn parts on transmission operation. Tools and testing equipment. Pressure testing transmission oil circuits; interpretation of results. Locating fluid leaks. Fluid characteristics due to burnt clutch or band lining. Air testing transmission circuits and units with controls partially dis-assembled. Stall testing transmissions. Testing oil—coolers. Effects of leaks. Results of introducing air into pressure circuits. Overhauling automatic transmissions. Pre-disassembly inspection. Removal and replacement. Tools and equipment for handling and lifting automatic transmissions. Gauges and test equipment. Marking and protecting parts during dis-assembly. Cleanliness. Cleaning solvents. Inspection of parts. Tolerance specifications. Fits and clearances. Torquing procedures. Air testing components on re-assembly. Road and dynamometer tests.
		Drive Shafts	Characteristics; open drive shafts, support bearings, universal joints, slip joints and enclosed drive lines. Dis-assembly, overhaul or relubing, re-assembly and re-installation. Torquing. Effects of imbalance.
		Axles and Differentials	Characteristics; multi-speed, tandem drive, trans axles, limited slip differentials, trailing axles, front driving axles. Gear ratios. Testing axle and differential operation. Methods of controlling front and rear axles, and differentials. Servicing, overhauling and adjusting axle and differential control mechanisms; Mechanical, electrical, air or vacuum operated. Removing, overhauling and re-installing axles and differentials. Re-assembling crown gears and pinions. Backlash and tooth contact. Gear match marking. Brinelling effects. Alignment of housings. Bearing preload. Lubrication. Oil sealing and venting.
		Axle Bearings and Oil Seals	Characteristics of axle bearings. Ball and roller types. Removing, relubing, replacing, adjusting or torquing. Characteristics of oil seals. Replacement methods.
11	Suspension Systems	Front End Geometry	Purpose and definition of caster, camber, toe-in, toe-out, ball joint or kingpin inclination. Diagnosis of alignment problems.
		Front Suspension (Solid Axle)	Application of solid axles. Elliot and Reverse Elliott. Construction characteristics, servicing and straightening procedures.
		Leaf Springs	Characteristics of leaf springs, mountings and related parts—single leaf, multi-leaf and helper springs. Inspection for wear, damage and distortion. Removing, overhauling and re-installing springs and related parts. Lubrication.
		Front and Rear Independent Suspension	Characteristics of front and rear independent suspension systems: coil spring, torsion bar, leaf spring and air-hydraulic. Ball-joint types. Inspecting suspension components. Acceptable wear limits. Characteristics of shock absorbers, stabilizers and radius rods. Overhaul of suspensions and related parts. Torquing. Lubrication. Sealed systems.

Overhauling of suspensions and related components. Re-alignment on re-assembly. Lubrication.
		Wheels and Rims	Types, sizes and characteristics. Wheel to hub fastenings and locating devices. Removing and re-installing wheels and rims. Correct jacking points. Inspecting, repairing and servicing wheels and rims. Run-out.
		Tires and Tubes	Types, sizes, characteristics and construction. Tire demounting and mounting methods; equipment and lubricants. Tire, tube and valve repair. Tire inflation precautions. Identification of tire wear and irregularities. Inspection for damage and faults. Tire rotation. Retreaded tires.
		Wheel and Tire Balancing	Static and dynamic balance. Wheel balancing equipment. Balancing wheels and related parts.
12	Brake Systems	Service Brakes	Types, function and principles of brake actuating devices; Manual and power assisted. Characteristics of brake operating systems; Hydraulic, vacuum-hydraulic, air-hydraulic, air, etc. Operation of system components. Inspection procedures. Dis-assembling and assembling of system components. Cleaning procedures. Assembly lubricants. Re-lining brake shoes. Reconditioning brake drums, and brake discs. Reconditioning wheel cylinders and master cylinders. Flushing or bleeding system. Flushing agents and approved fluids. Cleanliness. Servicing and adjustment of brakes. Clearances. Control valve adjustments and settings. Servicing tools and equipment. Road testing.
		Parking Brakes	Principles of brake actuating systems and components. Dis-assembly, inspection and assembly of components. Adjusting and testing.
13	Frames	Standard Type Frames	Types, construction and characteristics of frames, X-frame, ladder type, perimeter type. Frame damage; diamond, sag, twist, sway and kick-up. Frame damage inspection. Measuring tools and equipment. Straightening and alignment equipment. Frame re-alignment methods and hook-ups. Cross-member replacement techniques. Rivetting, welding and bolting frame members. Heat straightening of frame members. Improper repairs or modification of frames.
		Unitized Construction	Characteristics of unitized frames and suspension mountings. Effects of unitized frame damage. Inspection methods. Measuring tools and equipment. Straightening and alignment equipment. Replacement and re-alignment of underbody sections. Heat straightening. Sealing, painting and insulating. Simultaneous front end alignment check, for proofing.
14	Steering Systems	Manual Types	Construction characteristics of cam and lever, worm and roller, worm and sector, rack and pinion and recirculating ball types of steering gears. Overhauling power steering systems. Cleaning methods. Cleanliness. Removing, replacing steering assembly. Alignment and adjustment of steering gear boxes, columns and attached mechanisms.
		Steering Linkage and Alignment	Types and characteristics of steering linkages, bushings and joints. Factors affecting wheel alignment. Use of tools, gauges and equipment to measure caster, camber, balljoint or kingpin inclination, turning angles and toe-in. Correcting alignment angles; adjustment, shimming or bending. Correction sequence. Inspecting and overhauling steering linkage and joints. Securing and locking steering components. Lubrication. Lubricant. Sealed systems. Road testing.
15	Air-Conditioning and Refrigeration Systems	Refrigeration Principles	Heat transfer; conduction, convection, radiation. British thermal units. Latent heat of vaporization; effects of liquid change to vapor and vapor to liquid. Effects of pressure on boiling point and condensation. Refrigerant. The basic refrigeration system. Air induction and condensation removal systems.
		System Components	Types, characteristics and operation. Drive units, compressors and clutch drives, condensers, receivers, expansion valves, evaporators, control valves, thermostatic controls, blowers, electrical circuits. Refrigerant (Freon - 12), refrigeration oils, pressure lines and fittings.
		Inspection and Maintenance	Safety precautions and correct use of safety equipment. Inspection, testing, adjustment, overhaul and replacement procedures. Use of gauges and test equipment. Importance of exercising systems. Oil level checks and replenishment procedures. Testing for leaks. Purging, evacuating and re-charging procedures. Procedures for installation and removal of motor vehicle air-conditioning and refrigeration systems.

Adjusting valve lash.
		Engine Reconditioning	Engine and component dis-assembly; cleaning, inspection, repair, reconditioning or replacement. Boring, honing, grinding, alignment and fitting operations. Re-assembly of engines and components. Fits, clearances and tolerances. Torquing. Valve timing. Engine testing.
		Lubricants	Familiarization with lubricant characteristics, classifications and ratings; contamination and deterioration, frequency of change intervals.
		Lubricating Systems	Familiarization with types, operation and requirements. Servicing, overhaul or replacement of pumps, screens, oil lines and filters. Testing, servicing and adjustment of pressure indicators and controls and positive crankcase ventilation systems.
		Cooling Systems	Air and liquid cooled pressurized systems. Inspection, testing, overhaul or replacement of blowers, fans, water pumps, drives, radiators and caps, thermostats, hoses and connections, temperature indicators, immersion and hot water heaters, automatic transmission oil coolers. Radiator reverse flushing and flow-testing; use of cleaning agents, coolant additives, sealers. Testing anti-freeze solutions.
		Fuel Systems (Gasoline)	Mechanical fuel/vacuum and electric pumps. Tests for pressure, vacuum and volume. Repair, overhaul or replacement of pumps, tanks and supply lines. Familiarization with principles of carburetion and characteristics of carburetors, types, operation, circuits and systems; heat riser valves, heat insulators, choke tubes, dash pots, throttle return checks, anti-stall devices and air cleaners. Testing, adjusting, cleaning and overhaul operations.
		Tune-Up and Test Procedures	Use of electrical analyzers, vacuum gauges, tachometers and timing lights to adjust idle speeds and mixtures, analyze exhaust gases, locate excess vacuum leaks, balance multi-carburetors, check and correct ignition timing and operation, adjust electrical mechanisms, switches and operating linkage. Dynamometer testing to determine engine horsepower and torque output.
		Fuel Injection Systems	Servicing and overhauling fuel injection systems. Test equipment and testing operations. Injection timing. Servicing and overhauling starting systems. Shutting down runaway engines.
		Fuel Systems (Liquified Petroleum Gas and Vaporizing Oils)	Use and operation of liquified petroleum gas and vaporizing oil systems. Charging L.P.G. tanks.
3	Belt Drives	"V" Belts	Inspecting, installing and adjusting.
4	Exhaust Systems	Mufflers, Resonators, Exhaust and Tail Pipes	Back pressure checks. Replacing complete exhaust systems or parts. Stress relieving. Emission control systems; inspection and servicing.

Testing and replacement of condensers, rotors, caps, centrifugal and vacuum advance mechanisms and radio suppressors. Installation and timing. Synchronizing dual points and distributors. Engine speed adjustments.
		Ignition Coils	Inspection, testing and replacement; output, insulation and polarity tests.
		Primary and Secondary Circuits	Testing primary and secondary circuits. Replacement of primary and high tension wiring, primary circuit switches and resistors.
		Transistor and Transistorized Ignition Systems	Familiarization with principles of operation. Ignition timing. Use of test equipment. Testing, repair and overhaul procedures.
		Spark Plugs	Types, temperature control and heat ranges. Analyzing deposits. Testing, cleaning, gapping and installing. Torquing.
		Charging Systems D.C. (Generators) A.C. (Alternators)	Inspection and testing of generators, alternators, regulators, relays, wiring and ground circuitry. On and off vehicle tests. Removing, dis-assembling, cleaning, overhauling, testing and re-installing generators, alternators, regulators and relays. Lubrication. Polarizing generator. Contact cleaning, replacement and adjusting. Air gap adjustments. Replacing transistors and diodes. Bench testing and adjustment of regulators and relays.
		Starter Motors	Inspecting and testing starting circuits, motors, drive units, switches, solenoids, cables and wiring. Removing, dis-assembling, cleaning, overhauling, testing and re-installing. Lubrication.
		Special Starting Systems	Series parallel and magnetic switch systems. Diesel fuel preheating systems (Glow plugs). Testing, repairing or replacing components.
		Lights	Lighting circuits. Bulbs and seal beam units. Lenses and holders. Signal lights; flasher units. Aiming, testing, installing and repairing lights and wiring.
		Heaters and Defrosters	Testing, adjustment or replacement of blower motors, actuating or control systems.
		Horns	Electric and air/vacuum types. Electrical circuits and relays. Air/vacuum horn controls. Testing, adjusting, or replacement.

5		Windshield Wipers	Electric single and multi-speed and vacuum types. Speed controls and washer cycling. Overhaul, repair or replacement.
		Windshield Washer	Installing, repairing or replacing windshield washers and controls. Aiming fluid nozzles.
		Power-Assist Systems	Inspection, servicing and overhaul of electrical and electro-hydraulic power assist mechanisms and circuits; windows, tailgates, convertible tops, seats, etc.
6	Power Trains	Clutches	Single and multiplate; mechanical, hydraulic, vacuum, air and electrically operated controls; servicing and adjustment. Removal, dis-assembly, cleaning, inspection, over-hauling and re-installation. Control adjustments and clearances. Testing.
		Standard Transmissions	Standard transmissions; direct and remote controls, power assist mechanisms, over drives, auxiliary drives. Servicing and adjustment. Removal, dis-assembly, cleaning, inspection, overhaul and re-installation. Control adjustments. Lubrication. Testing.
		Automatic Transmissions	Shop testing; preliminary band and linkage adjustments; mechanical, electrical and vacuum control settings; checking of external connections and fluid levels. Familiarization with performance characteristics and specifications. Pressure testing transmission oil circuits; locating fluid leaks; interpretation of results. Air testing circuits and units (controls partially dis-assembled). Testing oil coolers. Stall testing automatic transmissions. Transmission removal. Pre-disassembly inspection. Dis-assembly, cleaning, inspection and overhaul procedures for planetary gears, friction clutches, over-running clutches, servos, bands and drums, fluid couplings, torque converters and hydraulic components. Torquing procedures. Air testing components on re-assembly. Re-installation of transmissions; control adjustments and settings. Road and dynamometer testing.
		Drive Shafts	Open drive shafts, support bearings, universal joints, slip joints. Enclosed drive lines. Removal, dis-assembly, overhaul, re-assembly and re-installation. Torquing.
		Axles and Differentials	Testing axle and differential operation. Servicing, overhauling and adjusting axle and differential control mechanisms; mechanical, electrical, air or vacuum operated. Removing, overhauling and re-installing axles and differentials. Lubrication.
		Axle Bearings and Oil Seals	Removing, relubing, replacing, adjusting or torquing. Oil seal replacement.
7	Suspension Systems	Front Suspension (Solid Axle)	Axle removal, overhaul and re-installation. Straightening operations; Correction of caster, camber and king-pin inclination. Lubrication.
		Leaf Springs	Single leaf, multi-leaf and helper springs; mountings and related components. Inspecting, removing, overhauling and re-installing. Lubrication.
		Front and Rear Independent Suspensions	Coil and leaf spring, torsion bar and air-hydraulic systems. Suspension mountings. Trimming dimensions. Overhaul of suspensions and related components; shock absorbers, stabilizers and radius rods. Removing compressed springs and related parts. Replacing bushings; maintaining pre-loading. Torsion bar replacement. Torquing suspension components. Assembly re-alignment. Lubrication; sealed systems.

7		Front and Rear Suspension Systems (Commercial Vehicles)	Leaf and coil spring, torsion bar, rubber and air cushion types. Overhaul of suspensions and related components, hangers and suspension control rods. Assembly re-alignment. Lubrication.
		Wheels and Rims	Removal, repair, servicing and re-installation. Handling equipment. Checking run-out.
		Tires, Tubes and Valves	De-mounting, inspection, repair and mounting. Equipment and lubricants. Tire inflation precautions. Recognition of tire wear, faults and misalignment. Tire rotation.
		Wheel and Tire Balancing	Use of on- and off-vehicle balancing equipment. Installation of weights.
8	Brake Systems	Service Brakes	Manual and power assisted; hydraulic, vacuum-hydraulic, air-hydraulic, air operated. Dis-assembly, inspection, overhaul or reconditioning and re-installation. Cleaning operations. Relining brake shoes. Reconditioning brake drums and discs, wheel cylinders and master cylinders. Flushing and bleeding systems. Flushing agents. Approved fluids. Servicing and adjustment. Control valve adjustments and settings. Road testing.
		Parking Brakes	Brake actuating systems and components. Inspection, overhaul or reconditioning. Adjusting and testing.
9	Frames	Standard Type	Determination of frame damage. Inspection. Frame straightening and alignment. Rivetting, welding and bolting frame members. Crossmember replacement. Heat straightening.
		Unitized Construction	Damage inspection. Straightening and alignment. Replacement and re-alignment of underbody sections and suspension mountings. Front end alignment proofing check. Heat straightening. Sealing, painting and insulating.
10	Steering Systems	Manual Types	Cam lever, worm and roller, worm and sector, rack and pinion, recirculating ball types. Gear shift controls and attached mechanisms. Removal, overhaul and re-installation of steering box and column assemblies. Lubrication. Alignment and adjustment. Road testing.
		Power Types	Integral and linkage types. Filling and bleeding systems. Approved fluids. Adjusting pump drives and belts. Testing pressures and valve operation. Adjustment and centering of control valves. Centering steering on high point. Removal, overhaul and re-installation of power steering systems. Alignment and adjustment. Road testing.
		Steering Linkage and Alignment	Use of gauges and equipment to measure caster, camber, ball joint or king-pin inclination, turning angles and toe-in. Correction of alignment angles by adjustment, shimming or bending. Correction sequence. Inspection and overhaul of steering linkage and joints. Securing and locking steering components. Lubrication; sealed systems. Road testing.
11	Air-Conditioning and Refrigeration Systems	Inspection and Maintenance	Familiarization with safety precautions and use of safety equipment. Inspection, testing, adjustment, overhaul or replacement of drive units, compressors and clutch drives, condensers, receivers, expansion valves, evaporators, control valves, thermostatic controls, blowers, electrical circuits, pressure lines and fittings, refrigerant. Oil level checks and replenishment. Purging, evacuating and recharging operations. Installation and removal of motor vehicle air-conditioning and refrigeration systems.

THE APPRENTICESHIP AND TRADESMEN'S QUALIFICATION ACT, 1964

O. Reg. 95/69.

Transmission Mechanic.

Made—December 19th, 1968.

Filed—March 20th, 1969.

REGULATION MADE UNDER THE APPRENTICESHIP AND TRADESMEN'S QUALIFICATION ACT, 1964

TRANSMISSION MECHANIC

1. In this Regulation,

- (a) "certified trade" means the trade of transmission mechanic;
- (b) "motor vehicle" means a vehicle propelled by an internal combustion engine, or a vehicle operated or controlled from a vehicle propelled by an internal combustion engine, that is registered for use on a highway under *The Highway Traffic Act* and is used primarily for the transport of persons, equipment or goods but does not include a vehicle,
 - (i) operated only on rails,
 - (ii) used for transportation solely within an employer's actual place of business, or
 - (iii) used for farming operations but not used for carrying a load;
- (c) "transmission mechanic" means a person engaged in the repair and maintenance of motor vehicles who inspects, maintains and repairs motor vehicle transmissions.

2. The trade of transmission mechanic is designated as a certified trade for the purposes of the Act.

3. An apprentice training programme for the certified trade is established and shall consist of,

- (a) training and instruction at full-time educational day classes provided at a College of Applied Arts and Technology or in classes that, in the opinion of the Director, are equivalent thereto; and
- (b) in practical training and instruction provided by an employer of the apprentice.

in the subjects contained in Parts 1 and 2 of the Schedule.

4.—(1) Subject to subsections 2 and 3, an apprentice shall complete three periods of training and instruction of 1800 hours per period.

(2) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma or has Ontario Grade 12 standing in English, Mathematics and Science or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete three periods of training and instruction of 1600 hours per period.

(3) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma majoring in auto mechanics or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete three periods of training and instruction of 1200 hours per period.

5. Any person who,

- (a) applies in the prescribed form for apprenticeship in the certified trade; and
- (b) becomes an apprentice in the certified trade within three months after commencing to work in that trade,

is exempt from subsection 2 of section 10 of the Act.

6. The rate of wages for an apprentice in the certified trade whether for his regular daily hours or for hours in excess of his regular daily hours shall not be less than,

- (a) 50 per cent during the first period of training and instruction;
- (b) 70 per cent during the second period of training and instruction; and
- (c) 90 per cent during the third period of training and instruction,

of the average rate of wages for journeymen employed by the employer in that trade, or where the employer is the only journeyman employed, of the average rate of wages for journeymen in the area.

7. The subjects of examination for an apprentice are the subjects set out in Parts 1 and 2 of the Schedule.

8. A certificate of qualification expires on the 31st day of October in each year.

THE APPRENTICESHIP AND TRADESMEN'S QUALIFICATION ACT, 1964

O. Reg. 96/69.

Heavy Duty Equipment Mechanic.

Made—December 19th, 1968.

Filed—March 20th, 1969.

REGULATION MADE UNDER THE APPRENTICESHIP AND TRADESMEN'S QUALIFICATION ACT, 1964

HEAVY DUTY EQUIPMENT MECHANIC

1. In this Regulation,

- (a) "certified trade" means the trade of heavy duty equipment mechanic;
- (b) "heavy duty equipment" means any mobile equipment and attachments thereto used for building construction and engineering construction or for logging, mining and farming operations but does not include equipment registered for use on a highway under *The Highway Traffic Act* used primarily for the transport of persons, equipment or goods;
- (c) "heavy duty equipment mechanic" means a person who services, repairs and maintains heavy duty equipment.

2. The trade of heavy duty equipment mechanic is designated as a certified trade for the purposes of the Act.

3. An apprentice training programme for the certified trade is established and shall consist of,

- (a) training and instruction at full-time educational day classes provided at a College of Applied Arts and Technology or in classes that, in the opinion of the Director, are equivalent thereto; and
- (b) in practical training and instruction provided by an employer of the apprentice,

in the subjects contained in Parts 1 and 2 of the Schedule.

4.—(1) Subject to subsections 2, 3 and 4, an apprentice shall complete five periods of training and instruction of 1800 hours per period.

(2) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma or has Ontario Grade 12 standing in English, Mathematics and Science or has such other academic qualification that, in the opinion of the Director, is equivalent thereto, he shall complete five periods of training and instruction of 1600 hours per period.

(3) Where the apprentice has successfully completed Grade 10 in Ontario or has such other academic qualification that, in the opinion of the Director, is equivalent thereto and in addition has successfully completed an approved pre-apprenticeship programme, he shall complete five periods of training and instruction of 1600 hours per period.

(4) Where the apprentice is the holder of an Ontario Secondary School Graduation Diploma or has Ontario Grade 12 standing in English, Mathematics and Science or has such other academic qualification that, in the opinion of the Director, is equivalent thereto and in addition has successfully completed an approved pre-apprenticeship programme, he shall complete five periods of training and instruction of 1200 hours per period.

5. A person holding a certificate of qualification in the certified trade of motor vehicle mechanic may qualify for examination for a certificate of qualification in the trade of heavy duty equipment mechanic by becoming indentured as an apprentice in the trade of heavy duty equipment mechanic and completing the final two periods of training and instruction of 1800 hours per period in the subjects contained in the Schedule.

6. Notwithstanding section 5, a holder of a certificate of qualification in the certified trade of motor vehicle mechanic may qualify for examination for a certificate of qualification in the trade of heavy duty mechanic by submitting written evidence, satisfactory to the Director, of having had at least two years experience as a journeyman in the trade of heavy duty equipment mechanic.

7. Sections 8 and 9 and subsections 2 and 3 of section 10 of the Act do not apply to a person who works or is employed in the certified trade.

8. The rate of wages for an apprentice in the certified trade whether for his regular daily hours or for hours in excess of his regular daily hours shall not be less than,

- (a) 50 per cent during the first period of training and instruction;
- (b) 60 per cent during the second period of training and instruction;
- (c) 70 per cent during the third period of training and instruction;
- (d) 80 per cent during the fourth period of training and instruction; and
- (e) 90 per cent during the fifth period of training and instruction,

of the average rate of wages for journeymen employed by the employer in that trade, or where the employer is the only journeyman employed, of the average rate of wages for journeymen in the area.

9. The subjects of examination for an apprentice are the subjects set out in Parts 1 and 2 of the Schedule.

10. A certificate of qualification in the certified trade remains in force until cancelled or suspended in accordance with the regulations.

Cam lobes, single and double contact points, dwell angle, condensers. Centrifugal and vacuum advance. Secondary voltage distribution. Radio suppression. Ignition timing. Inspection, testing and overhaul procedures. Synchronizing dual points and distributors. Engine speed settings.
		Magneto Ignition	Characteristics, construction and principles of operation. Primary and secondary circuits. Breaker mechanisms. Impulse couplings. Spark advance methods. Timing procedures. Magneto inspection, testing, adjusting and overhaul.
		Spark Plugs	Characteristics and operation. Temperature control and heat ranges. Radio suppression. Analyzing deposits. Testing, cleaning, gapping and installing. Torquing.
		D.C. Charging Systems (Generators)	Characteristics. Internally and externally grounded fields. Positive and negative grounded systems. Generator construction; principles of operation. Electro-magnetic induction. Electrical and magnetic circuits. Commutation. Polarizing. Regulators and relays; principles of operation and construction features. 2 and 3 unit, double contact, heavy duty and carbon pile regulators. Voltage and current regulation; cut-out relays. Temperature compensation.
		A.C. Charging Systems (Alternators)	Characteristics. Internally and externally grounded fields. Positive and negative ground systems. Internally and externally grounded systems. Alternator construction; principles of operation. Electro-magnetic induction. Electrical circuits ("Y" and delta). Magnetic circuits. Rectification. Current limitation. A.C. regulators and relays; vibrating contact, transistorized, transistor types. Principles of regulator and relay operation. Voltage regulators, field relays. Temperature compensation.
		Inspection, Testing Repair and Overhaul	Inspection and test procedures for generators, alternators, regulators, relays, wiring and ground circuitry. Removing, dis-assembling, cleaning, overhauling, adjusting, bench-testing and re-installing generators, alternators, regulators, and relays. Replacing wiring. Replacing transistors and diodes. Generator and alternator lubrication.
		Starter Motors	Characteristics. Construction features. Principles of operation. Electro-magnetism. Electric and magnetic circuits. Commutation. Series and compound cranking motors. Starter motor drive units. Motor solenoids and switches. Solenoid circuits; battery disconnect switches. Inspecting and testing starting circuits; motors, solenoids, cables and wiring. Cleaning, repair and overhaul procedures.

9		Special Starting Systems	Series parallel and magnetic switch systems. Diesel starting aids; glow plugs, air heaters, flame primers, ether capsules. Air and hydraulic starter motors, drive units and controls. Testing, repairing or overhauling components.
		Lights	Type and characteristics. Bulbs and seal beam units. Lenses and holders. Signal lights; flasher units, radio interference. Series and parallel circuits. Circuit fuses. Ground circuits. Aiming, testing, installing and repairing lights.
		Horns	Characteristics. Electric and air/vacuum types. Horn operation. Electrical circuits and relays. Amperage draw. Air/vacuum horn controls. Fuses. Inspecting and adjusting horns.
		Windshield Wipers	Characteristics and operation; electric single and multi-speed, air/vacuum types. Drives and linkage. Arms and blades. Speed control. Fuses. Washer operation and cycling. Overhaul and repair procedures.
		Heaters and Defrosters	Types, characteristics and operation. Testing, adjustment or replacement of blower motors, actuating and control systems and components.
10	Power Trains	Clutches (Including Cranes and Shovels)	Types, characteristics and construction features; over-center and spring-loaded. Single plate, multi-plate. Oil and dry types. Function of controls; mechanical, hydraulic, vacuum, air and electrically assisted. Adjustments. Dis-assembly, inspection and overhaul of clutches and components. Assembly lubricants. Clutch re-installation; aligning procedures; control adjustments and clearances. Testing.
		Manual Shift Transmissions	Types, characteristics and construction features. Constant mesh and sliding gear transmissions. Over-drive units and auxiliary transmissions. Gear ratios, speed ranges. Spur gears, helical gears, bevel gears and pinions, gear shift inter-locks and sliding jaw clutches, internal shift mechanisms. Power flow paths. Lubrication; oil sealing and venting, oil filters. Direct, remote and assist control mechanisms; servicing and adjustments. Removal and overhaul of transmissions, linkages and controls. Inspection procedures. Bevel gear and pinion adjustments. Bearing pre-load. Re-installation and adjustments.
		Power Shift Transmissions (Hydraulic)	Types, characteristics and construction features. Principles of operation of planetary gears, clutch packs; friction and reaction plates, servos, bands and drums, fluid couplings, torque converters and dividers, single and double stage. Hydraulic components and circuits. Speed ranges and power flow paths. Transmission oils; oil coolers and filters; oil sealing and venting; draining, refilling and level checking procedures. Test procedures; tools and testing equipment. Performance characteristics; comparison with specifications; interpretation of results. Stall testing torque converters. Testing oil coolers. Removal, overhaul and re-installation procedures for transmissions, fluid couplings and torque converters; tools, gauges and handling equipment. Cleanliness. Inspection of parts; tolerance specifications, fits and clearances. Torquing procedures. Control adjustments.

10		Drive Shafts	Characteristics; open drive shafts, center or support bearings, universal joints, flexible couplings, slip joints and enclosed drive lines. Dis-assembly, overhaul or re-lubing; alignment, re-assembly and re-installation procedures. Torquing.
		Axles and Differentials	Characteristics and function. Live axle types. Multi-speed, tandem drive, trans-axles, standard and torque proportioning differentials, front driving axles, wheel planetary drives. Lubrication; oil sealing and venting. Axle and differential control mechanisms; mechanical, electrical, air or vacuum operated: Testing, adjusting, and overhaul procedures. Types and characteristics of axle bearings. Removing, re-lubing, replacing, adjusting or torquing. Oil seals and deflectors; replacement methods. Removing, overhauling and re-installing axles and differentials. Backlash and tooth contact adjustments; bearing preload.
		Final Drives (Crawler Tractors)	Types and characteristics; single and double reduction spur gears and planetary reduction. Bearings. Oil seals. Hub, sprocket and shaft removal. Inspection, overhaul and adjustment procedures. Use of hydraulic pullers.
11	Running Gear	Front End Geometry	Purpose and definition of caster, camber, toe-in, and kingpin inclination. Correction methods and sequence.
		Front Suspension (Solid Axle)	Construction features. "I" beam and trunnion mounted types. "A" frames, radius rods. Servicing and straightening procedures.
		Suspension Systems	Characteristics of leaf springs, helper springs, mountings and related parts. Coil spring, torsion bar and air/hydraulic, nitrogen/hydraulic suspension systems. Shock absorbers, stabilizers, hangers and suspension control rods. Inspecting, overhauling suspensions and related components. Torquing. Lubrication.
		Chassis and Main Frames	Types and construction features; wheeled equipment. Crawler-base equipment; "A" frames, base, arch and deck frames. Equalizer bars. Pivot shafts. Draw-bars. Outriggers (truck mounted cranes). Inspection, repair and aligning procedures. Heat straightening. Rivetted, welded and bolted frame repairs.
		Track Assemblies	Types and construction features; track frames, front idlers, track rollers, carrier rollers, bearings, seals, recoil cylinders and springs. Tracks; shoes, links, bushings, pins, drive sprockets. Track tensioning systems. Track system wear points and measurement. Pivot shaft and equalizer bar mountings. Inspection, repair and overhaul procedures. Track frame alignment and straightening. Correct lifting and supporting methods. Hydraulic track pin removal equipment.
		Steering Systems (Wheeled Equipment)	Types and characteristics; cam and lever, worm and roller, worm and sector, re-circulating ball. Steering linkage, bushings and joints. Pumps, control valves and steering cylinders. Feed-back methods. Lean-ing wheel mechanisms. Multi-wheel steering. Oil seals. Level checking. Bleeding systems. Inspection, adjustment and overhaul procedures.

		Wheels and Rims	Types, sizes and characteristics. Wheel to hub fastenings and locating devices. Removing and re-installing wheels and rims. Correct jacking points. Inspecting, repairing and servicing. Permissible run-out.
		Tires and Tubes	Types, sizes, characteristics and construction. Inspection and identification of tire wear and irregularities. Demounting and mounting methods; equipment and lubricants. Tire, tube and valve repair. Inflation precautions. Retreaded tires. Tire weighting to improve traction; dry and liquid methods.
12	Brake Systems	Service Brakes	Types, function and principles of brake actuating devices and brake operating systems; hydraulic, air, air-hydraulic, electric. Operation of system components; air compressors, unloader valves, governors, reservoirs; emergency relay valves, treadle controls, quick release valves, protection valves, low pressure indicators, flexible hoses and fittings. Operation of brake chambers, slack adjusters, brake shoes and linings, anchor pins, cam-shafts and rollers. Master cylinders and wheel cylinders. Hydraulic and exhaust type hill-retarder systems. Inspection, overhaul, re-assembly, adjustment and testing of brake assemblies and systems. Servicing intervals. Re-assembly lubrication. Road testing.
		Parking and Emergency Brakes	Characteristics and construction features; disc and drum types. Maxi-brakes. Inspection, adjusting and overhaul procedures.
13	Hydraulics	Basic Principles	Hydraulic principles; Pascal's Law. Basic hydraulic systems and schematics. Applications. Safe work practices.
		Pump Units	Characteristics; vane, gear and piston pumps. Positive displacement, fixed and variable delivery. G.P.M. flow. Aeration. Cavitation. Hydraulic fluid types and characteristics. Inspection, testing and overhaul procedures.
		Hydraulic Cylinders	Types and characteristics; single and double acting, single and double end. Cushion rings and plungers. Seals and packings. Inspection, servicing and overhaul procedures.
		Hydraulic Valves and Lines	Valve types and characteristics; flow types; check, flow-control, divider. Pressure types; relief (simple compound), differential, modulating, safety. Control types; spool, 2-way, 4-way. Inspection, testing, servicing and overhaul procedures. Hydraulic lines and fittings; selection of pipes, tubing and flexible hoses; working pressures, temperature requirements. Installation and maintenance procedures.
		Reservoirs and Accumulators	Reservoir characteristics and construction features; capacity, location, clean-outs, filters, strainers, baffles, breathers. Heat dissipation. Fluid coolers. Condensation. Heaters for extreme low temperature operation. Accumulator characteristics and function; Spring loaded and gas charged (nitrogen) types. Surge and shock damping action. Servicing and overhaul procedures.

Radiator reverse flushing and flow-testing; use of cleaning agents, coolant additives, sealers. Testing anti-freeze solutions.
		Fuel Systems (Gasoline)	Mechanical fuel/vacuum and electric pumps. Testing, repair, overhaul or replacement of pumps, tanks and supply lines. Carburetors; types, operation, circuits and systems. Air cleaners. Testing, adjusting, cleaning, overhaul and tune-up operations.
		Fuel Injection Systems	Pre-combustion chambers, air cells, energy cells. Dual fuel engines. Manifolds. Air cleaners. Air heaters. Blowers and turbo-chargers. After-coolers. Fuel tanks, lines, air traps, filters, water traps, primary transfer pumps, pressure regulating valves. Hydraulic, distributor, pressure-time injection pumps. Hydraulic, mechanical, P.T., unit injectors. Fuel injection and air induction system inspection, adjustment, overhaul and testing operations. Timing and calibrating pumps and testing injector operation. Bleeding systems. Timing pumps to engines. Governors and controls. Speed/load adjustments and overhaul operations. Shutting-down over-speeding engines.
		Fuel Systems (Liquified Petroleum Gas and Vaporizing Oils)	Use and operation of L.P.G. systems. Charging L.P.G. tanks. Principles of operation using vaporizing oils.
3	Belt and Chain Drives	Installation and Maintenance	Inspecting, installing, aligning and adjusting; "V" belts, pulleys, chains and sprockets.
4	Exhaust Systems	Mufflers, Pipes, Components	Back pressure checks. Replacing exhaust systems. Overhauling components.
5	Electrical Systems	Electrical Circuits	Identification, tracing and testing of circuits. Use of voltmeters, ammeters and ohmmeters. Joining, splicing, soldering and insulating wires and cables. Removal and installation of terminals, connectors, plugs, resistances, fuses, circuit breakers, conduit.
		Switches and Instruments	Switches, relays and gauges, meters, indicator lights, rheostats, resistors, capacitors and semi-conductors. Testing, repair and replacement.
		Batteries	Inspection, testing and maintenance. Use of voltmeters, ammeters, load resistances and hydrometers. Battery charging. Activation of dry-charged batteries. Battery heaters.
		Coil Ignition Systems	Ignition coil inspection, testing and replacement. Testing primary and secondary circuits. Replacement of primary and high tension wiring, primary circuit switches and resistors. Distributor tests. Inspection and overhaul procedures. Lubrication. Installation and timing. Synchronizing dual points and distributors. Engine speed adjustments.

THE APPRENTICESHIP AND TRADESMEN'S
QUALIFICATION ACT, 1964

O. Reg. 97/69.
Automotive Machinist.
Made—March 13th, 1969.
Filed—March 20th, 1969.

REGULATION MADE UNDER
THE APPRENTICESHIP AND TRADESMEN'S
QUALIFICATION ACT, 1964

AUTOMOTIVE MACHINIST

1. In this Regulation,

- (a) "certified trade" means the trade of automotive machinist;
- (b) "motor vehicle" means a vehicle propelled by an internal combustion engine, or a vehicle operated or controlled from a vehicle propelled by an internal combustion engine, which is registered for use on a highway under *The Highway Traffic Act* and is used primarily for the transport of persons, equipment or goods, but does not include a vehicle,

(i) operated only on rails,

(ii) used for transportation solely within an employer's actual place of business, or

(iii) used for farming operations but not used for carrying a load;

(c) "automotive machinist" means a person who,

- (i) reconditions and rebuilds internal combustion engines and associate components, power trains, brake system components and suspension system components,
- (ii) dis-assembles, cleans, inspects, reconditions and adjusts crankshafts, camshafts, drive shafts, cylinder heads, cylinder blocks, manifolds and flywheels,
- (iii) balances rotating parts, fits pins, grinds and turns brake drums and brake discs and faces brake shoes,
- (iv) bores and sleeves cylinder blocks, rebores and finishes engine cylinders,
- (v) reconditions connecting rods, services valve trains, resizes pistons and aligns borings,
- (vi) welds crankshafts and cams, braces saddle bores and metallizes engine parts,
- (vii) tests cylinder blocks, manifolds, cylinder heads and engines, and
- (viii) rebuilds engine components and parts.

2. The trade of automotive machinist is designated as a certified trade for the purposes of the Act.

3. An apprentice training programme for the certified trade is established and shall consist of,

- (a) training and instruction at full-time educational day classes provided at a College of Applied Arts and Technology or in classes that, in the opinion of the Director, are equivalent thereto; and
- (b) practical training and instruction provided by an employer of the apprentice,

in the subjects contained in Parts 1 and 2 of the Schedule.

4.—(1) Subject to subsections 2 and 3, an apprentice shall complete four periods of training and instruction of 1800 hours per period.

(2) Where the apprentice is the holder of an Ontario Grade 12 Secondary School Graduation Diploma majoring in auto mechanics or machine shop practice, or has such other qualification that, in the opinion of the Director, is equivalent thereto, he shall complete four periods of training and instruction of 1500 hours per period.

(3) Where the apprentice,

- (a) has successfully completed that part of the training programme established for the certified trade under clause a of section 3, consisting of training and instruction at full-time educational day classes provided at a College of Applied Arts and Technology or in classes that, in the opinion of the Director, are equivalent thereto, in the subjects contained in Parts 1 and 2 of the Schedule; and

(b) displays such aptitude and ability that, in the opinion of his employer submitted in writing to the Director, the apprentice has attained the level of competence of a journeyman in the certified trade,

the apprentice need only complete the first three periods of training and instruction of 1800 hours per period set out in subsection 1.

5. A person holding a certificate of qualification in the certified trade of motor vehicle mechanic may qualify for examination for a certificate of qualification in the trade of automotive machinist,

- (a) by becoming indentured as an apprentice in the trade of automotive machinist and completing the final two periods of training and instruction of 1800 hours per period in the subjects contained in Parts 1 and 2 of the Schedule; or
- (b) by submitting written evidence, satisfactory to the Director, of having had at least two years' experience as a journeyman in the trade of automotive machinist.

6. Sections 8 and 9 and subsections 2 and 3 of section 10 of the Act do not apply to any person who works or is employed in the certified trade.

7. The rate of wages for an apprentice in the certified trade, whether for his regular daily hours, or for hours in excess of his regular daily hours, shall not be less than,

- (a) 60 per cent during the first period of training and instruction;
- (b) 70 per cent during the second period of training and instruction;
- (c) 80 per cent during the third period of training and instruction; and
- (d) 90 per cent during the fourth period of training and instruction,

of the average rate of wages for journeymen employed by the employer in that trade, or where the employer is the only journeyman employed, of the average rate of wages for journeymen in the area.

8. The subjects of examination for an apprentice are the subjects contained in Parts 1 and 2 of the Schedule.

9. The number of apprentices who may be employed by an employer in the certified trade shall not exceed,

- (a) where the employer is a journeyman in the certified trade, one apprentice plus an additional apprentice for each additional two journeymen employed by the employer in the certified trade and with whom the apprentice is working; or
- (b) where the employer is not a journeyman in the certified trade, one apprentice for the first journeyman employed by the employer plus an additional apprentice for each additional two journeymen employed by the employer in the certified trade and with whom the apprentice is working.

10. A certificate of qualification in the certified trade remains in force until cancelled or suspended in accordance with the regulations.

Schedule

AUTOMOTIVE MACHINIST

PART 1

In-School Training

ITEM	COLUMN 1	COLUMN 2	COLUMN 3
	Course	Subject	Instruction To Be Given
1	Mathematics	Arithmetic	Addition, subtraction, division of whole numbers, fractions and decimals, ratio and proportion, areas and volumes.
		Geometry	Lines, planes and angles.
2	Science	Physics	Basic laws and principles, formulae. (Given as required in shop instruction.)
3	English	Usage and Business Communications	Trade terminology and usage. Letter and report writing. Work and parts orders. Interpretation and use of manufacturers' manuals.
4	Drafting	Basic Drafting and Interpretation	Preparation of elementary working drawings and dimensioned sketches of automotive components. Interpretation of exploded drawings, electrical and hydraulic circuits and schematics used in manufacturers' manuals.
5	General Shop Practice	Safety	Safety rules and safe operating procedures. First aid. Fire prevention. Use and maintenance of fire-fighting equipment. Handling of gasoline, oils and cleaning solvents. Danger of carbon monoxide fumes. Correct use of lifting and hoisting equipment. Good housekeeping.
		Hand Tools	Selection and use of hammers, punches, chisels, pliers, wrenches, sockets, screwdrivers, hacksaws, files, drifts, scrapers, snips, clamps, drill bits, reamers, vises, taps and dies. Stud extractors. Tool crib procedures.
		Power Tools	Care and use of portable air/electric drills, impact tools, grinders.
		Benchwork	Cutting with hacksaw, filing, chipping, scraping. Use of bench and pedestal drill presses: drilling, counter-sinking, counterboring, tapping, reaming, polishing, lapping. Coolant use. Bench grinder use: grinding drill bits, chisels, etc. Fitting bearings, bushings. Cutting and flaring tubing. Soldering. Babbitting principles. Gasket making. Oxy-acetylene and arc welding and cutting. Brazing techniques. Care and maintenance of welding equipment.
		Measuring Instruments	Use of rules, straight edges, protractors and squares. Feeler gauges, calipers, verniers, micrometers, telescopic gauges, ball gauges, dial indicators, gauge blocks, limit gauges, pressure gauges. Surface finish measuring principles. Instrument testing and calibrating procedures. Surface plate use.
		Fastening Devices	Purpose and types of bolts, nuts, studs, screws and tube fittings. Thread identification and classification. Tensile strengths. Installation procedures. Tightening torques. Cutting internal and external threads. Removing broken studs. Use of heli-coil type thread inserts. Purpose and types of rivets, keys, springs, flat and lock washers, snap rings, circlips, cotter pins. Installation and removal. Thread lubricants, sealers and locking compounds.

Schedule—Continued

ITEM	COLUMN 1	COLUMN 2	COLUMN 3
	Course	Subject	Instruction To Be Given
5		General Shop Equipment	Capacities and correct usage of floor cranes, hoists, jacks, stands, hydraulic pullers. Power hacksaws. Operation and maintenance of degreasing and steam-cleaning equipment. Operation and running maintenance of air compressors.
6	Internal Combustion Engine Principles	Types and Definitions	Principles of operation; 2 and 4 stroke cycles. Gasoline and diesel engines; types—single and multi-cylinder, in-line, slanted, "V" types, flat or pancake. Definition of bore, stroke, combustion, piston displacement, clearance volume, swept volume, compression ratios and pressures, horsepower, torque. Engine formulae. Heat transfer. Combustion chamber design and efficiency.
		Engine Components	Types and function of major engine components: cylinder blocks, sleeves and liners, cylinder heads, pistons and rings, wrist pins, connecting rods. Bearings, crankshafts, valves and guides, valve trains, camshafts, timing gears or chains, gaskets, manifolds, flywheels and ring gears. Vacuum and compression tests; valve lash. Effects of maladjusted, mis-aligned, worn, defective or improperly installed engine parts or components, on engine operation and life.
		Reconditioning Effects	Effects of dimensional changes due to rebor-ing, sleeving, grinding heads and blocks, grinding crankshafts and stroking, correcting and align boring main bearing saddles, regrinding camshafts; valve, valve seat and port grinding, varying head gasket thickness.
		Lubricants	Types and classification; contamination and deterioration, effect on engine wear.
		Engine Systems	Types, principles of operation, components: lubrication, cooling, carburetion and fuel injection, ignition and exhaust systems. Effects of maladjusted, inoperative, worn or damaged systems on engine operation and performance.
7	Trade Tools and Procedures	Engine and Component Dis-assembly and Cleaning	Procedures, sequence and tools required. Parts marking and identification; maintaining operating relationship. Removing seized parts. Cylinder ridge and liner removal procedures. Separation of ferrous and non-ferrous parts for correct cleaning methods. Cleaning techniques for ferrous and non-ferrous parts. Safety precautions. Cleaning blocks, heads and component parts.
		Inspection	Visual inspection of engine and component parts. Use of measuring devices and manufacturer's wear limit specifications. Identification of re-usable, re-claimable or scrap parts. Detection of cracks, flaws and fatigue in ferrous and non-ferrous parts. Use of magna-flux, fluorescent, ultrasonic, air, hydraulic or hardness testing equipment on materials. Interpretation of results and appropriate action.
		Cylinder Blocks and Heads (Cold Repairs)	Techniques, equipment and procedures for "stitching" cracks in heads and blocks.

Schedule—Continued

ITEM	COLUMN 1	COLUMN 2	COLUMN 3
	Course	Subject	Instruction To Be Given
7		Cylinder Boring	Definition of bore ovality and taper; rebore limits, sleeves and liners. Boring bar types, characteristics. Set-up, operation and maintenance. Bore and crankshaft axes alignment. Cutting tool grinding. Surface finishes. Honing allowance. Block checking. Main bearing cap re-installation to maintain rigidity. Aligning and boring cylinders to oversize limits, allowing stock for honing. Boring and counter boring for sleeving. Sleeve and liner installation procedures.
		Honing	Types and characteristics of honing machines, hand hones and honing stones. Set-up, operation and maintenance. Stone selection, obtaining required surface finish and specified fits. Avoidance of taper and ovality. Honing cylinders: rough and fine honing procedures with or without pre-boring. Deglazing cylinders; cross hatching procedures. Resizing connecting rods and honing rod wrist-pin bushings. Honing wheel and master cylinders. Honing piston bosses for fitting pins. Honing valve guides, king-pin and rocker arm bushings.
		Piston Grinding, Knurling and Re-Grooving	Purpose and principles of piston grinding. Set-up and operation of piston grinding machine. Avoidance of piston distortion during machining. Piston knurling: purpose and methods. Expanding pistons to useable tolerance. Piston re-grooving: restoring ring groove dimensions by oversizing ring width or top spacer installation after machining.
		Connecting Rod Reconditioning	Types and characteristics of connecting rod re-conditioning machines and equipment. Set-up, operation and maintenance. Maintaining manufacturers' tolerances. Holding centre to centre dimensions and parallelism between machined bores. Reconditioning rods: grinding parting surfaces for re-sizing. Cap assembly and wrist-pin bushing installation. Boring, grinding or honing bores to specified tolerances. Fitting pistons to rod assemblies. Alignment checking and straightening procedures.
		Interference Pin Fitting	Use of correct tools and techniques for thermal or cold press installation. Removing and installing press fit piston pins. Fitting oversize pins to worn pistons and connecting rods.
		Valve Train Servicing (Valves, Rocker arms, Tappets)	Set-up, operation and maintenance of valve grinders. Types of stones and dressing procedures. Regrinding valve head seating surface to correct finish and degree angle. Maintaining concentricity. Valve usability limits. True-ing ends of valve stems. Setting clearances on free valve assemblies. Re-contouring rocker arm. Refacing tappets. Reaming blocks for oversize tappets.
		(Valve Seats)	Set-up, operation and maintenance of valve seat grinders. Types of stones and dressing procedures. Re-grinding valve seats to correct interference angle, width and concentricity to valve guides. Seat and valve depth re-grinding limits; possible need for seat inserts to restore installation height.
		(Valve Seat Inserts)	Interference fit and threaded types; construction materials. Installation methods. Set-up, operation and maintenance of insert installation equipment. Counterboring and internal threading procedures for respective inserts. Insert installation.

7		(Valve Installation)	Procedures for lapping valves and testing contact area. Complete installation of valve assemblies in blocks or heads. Checking valve spring tension; selection of shims to compensate for dimensional changes due to machining, etc. Hydraulic lifters: use of test equipment for leakdown tests. Visual check for body and contact face wear.
		Surface Grinding	Set-up, operation and maintenance of surface grinding equipment. True-ing up distorted surfaces to correct finish and dimensions, with minimum stock removal. Fixture use. Resurfacing cylinder heads, blocks and manifolds. True-ing up mounting surfaces of manifolds, water outlets, bell housings and timing covers.
		Milling	Set-up, operation and maintenance of milling machines. Work holding, cutter types, speeds and feeds. Typical trade related milling operations.
		Flywheel Grinding	Set-up, operation and maintenance of flywheel grinders. Grinding friction surfaces of all flywheel types. Grinding clutch pressure plates: holding dimensions and maintaining concentricity with mounting surface.
		Hydraulic Press Operations	Types, capacities. Safe set-up, operation and maintenance. Procedures for straightening crankshafts, cam-shafts. Use of "V" blocks and dial indicators. Pressing bearings and gears on and off shafts. Installation of ball, needle and taper roller anti-friction bearings. Interference fits; adjusting or pre-loading. Rivetting drums to hubs.
		Crankshaft Grinding	Crankshaft identification. Repairing badly worn or damaged journals, straightening and centering procedures. Set-up, operation and maintenance of crankshaft grinders. Mounting, balancing, dressing and forming radii on grinding wheels. Crankshaft suspension on centres or chuck. Bearing undersizes. Surface finishes. Regrinding journal and main bearing surfaces, radii and thrust surfaces to correct surface finish and under sizes required, maintaining correct centre displacement, degree relationship and axis concentricity on all journals. Inspection and repair procedures for internal and external threads, keyways, pilot bearing bores, dowel holes. Re-machining flywheel mounting surfaces. De-burring and chamfering oil holes. Polishing bearing surfaces to required finish. Application of rust inhibitor. Bearing surface protection.
		Portable Crankshaft Grinding	Procedures for emergency field grinding repairs in the chassis. Set-up and operation of portable grinder and driving mechanism.
		Camshaft Grinding	Camshaft repair and straightening. Set-up, operation and maintenance of camshaft grinders. Grinding camshaft lobes and journals. Undersize limits. Custom modifications.
		Brake Service	Set-up, operation and maintenance of brake drum lathes. Arbor use. Machining and grinding friction surfaces, surface finishes. Brake drum safety limits. Attaching brake linings to shoes by rivetting, bonding or bolting; grinding to required radii for correct contact with machined drum surface. Set-up, operation and maintenance of brake disc machining equipment. Finishing brake discs to specified limits.

7		Bearing Resizing	Resizing bearings, including machining of thrust faces of flanged bearings or thrust washers. Resizing rod bearings: fitting and assembling bearings to rods and boring to size.
		Align Boring	Preparatory operations: cap grinding or milling; installation of bearings and shims or bushings as required. Set-up, operation and maintenance of align boring machine. Procedures for sizing main and camshaft bearings, accessory shaft bushings. Boring of distorted or misaligned main bearing saddle bores to standard dimensions. Sleeving of main or camshaft bearing saddles to correct damage caused by seized shafts or bearings.
		Engine Lathe Work	Set-up, operation and maintenance. Work holding; chucks, collets, face plates. Tool bits: selection and grinding: speeds and feeds. Centering, facing, turning, boring, taper turning, threading and chasing, parting operations. Production of simple threaded cylindrical parts from sketches or drawings. Procedures for turning and grooving bushings, repairing pulleys, lightening flywheels, true-ing up differential cases and worn race seats, re-sizing piston ring grooves, turning and undercutting automotive or marine starter and generator armature commutators.
		Balancing Rotating and Reciprocating Parts	Types and characteristics of mechanical and electronic balancing equipment. Set-up and operation. Detection of forces creating vibrations in rotating parts in all planes. Static and dynamic corrections required to correct imbalance through operational speed range, by weight application or removal, without affecting physical properties or strength of parts.
		Final Engine Assembly	Checking all new and rebuilt parts, before assembly in engine blocks. Fitting re-assembly procedures and sequence. Checking all fits, clearances and tolerances. Valve timing procedure. Torquing procedures and specifications. Testing engine assemblies for excessive oil throw-off: use of oil pressure tank.
		Engine Run-In	Installation of assembled engines in test stands. Motoring and dynamometer testing for specified periods. Checking oil pressure and compression. Inspecting for oil leaks or abnormal noises. Retorquing heads. Resetting valve lash to specifications. Painting engines. Preparing and affixing reconditioning data tags. Shipping preparation procedures.
8	Automotive Machine Shop Management	Operations	Business organization: types of ownership. Machine shop equipment. Advertising methods. Salesmanship. Business law: financial operations. Government regulations applicable to automotive machine shops, journeymen and apprentices. Parts and supplies ordering: trade discounts. Quality control: acceptable standards, warranties.
		Costing	Elementary bookkeeping: average operation times, labour, parts and overhead costs. Use of pricing lists and manuals. Billing typical reconditioning work.
		Public Relations	Proper conduct and business dealings in relation to employer, customers and co-workers. Punctuality.

Work Experience Training

ITEM	COLUMN 1	COLUMN 2	COLUMN 3
	Course	Subject	Work Instruction and Experience
1	General Shop Practice	General	Safety rules and removal of all safety hazards. Use of hand and power tools, measuring instruments, fastening devices and general shop equipment. Benchwork operations. (As detailed in Part 1.)
2	Internal Combustion Engine Principles	Types, Components and Operations	Familiarization with gasoline and diesel engine types, designs, component and correct operation. Recognition of abnormal engine noises and causes. Vacuum and compression testing. Identification of effects of maladjusted, mis-aligned, worn, defective, or improperly installed engine parts or components, on engine operation and life.
		Reconditioning Effects	Familiarization with effects of dimensional changes due to reconditioning and rebuilding operations.
		Lubricants	Familiarization with types and classifications. Effects of contamination and deterioration on engine wear.
		Engine Systems	Effects of maladjusted, inoperative, worn, leaking or damaged lubrication, cooling, carburetion and fuel injection ignition and exhaust systems on engine operation and performance.
3	Trade Tools and Procedures	Engine and Component Disassembly	Dismantling engine and component assemblies. Marking and identifying parts. Maintaining operating relationship. Cleaning cylinder blocks, heads and component parts by appropriate methods.
		Inspection	Familiarization with use of measuring devices and wear limit specifications. Use of test equipment or materials to detect cracks, flaws or fatigue in ferrous or non-ferrous parts. Identification of re-usable, reclaimable or scrap parts.
		Cylinder Blocks and Heads (Cold Repairs)	Crack "stitching" operations.
		Cylinder Boring	Boring bar set-up, operation and maintenance. Cutting tool grinding. Block checking and preparation. Aligning and boring cylinders, allowing for honing. Boring and counter boring for sleeving. Sleeve and liner installation.
		Honing	Set-up, operation, maintenance and use of honing machines, hand hones. Rough and fine honing cylinders with or without pre-boring. Deglazing cylinders. Resizing connecting rods and honing rod wrist-pin bushings. Honing wheel and master cylinders, piston bosses, valve guides, king-pin and rocker arm bushings.
		Piston Grinding, Knurling and Re-grooving	Set-up, operation and maintenance of piston grinding machines. Knurling pistons to useable tolerances. Oversizing ring width or top spacer installation after machining.
		Connecting Rod Reconditioning	Set-up, operation and maintenance of connecting rod reconditioning machines and equipment. Reconditioning rods: re-sizing, boring, grinding or honing bores. Fitting pistons to rod assemblies. Alignment checking and correction.

December 6th,	" "	49	" " " " " "	—March 8th,	"

Advertisements of tax sales must be received by the Queen's Printer at least **TWO WEEKS PRIOR TO THE DATE OF PUBLICATION IN THE ONTARIO GAZETTE.**

ADVERTISING RATES FOR TAX SALES

2.—(1) The rates payable for publication of matters in THE ONTARIO GAZETTE shall be,—

(a) for a double-column insertion of,—

(i) a notice of the sale of land for arrears of taxes, \$5; and

(ii) a list of lands liable to be sold for arrears of taxes, \$2 for each quarter-inch or fraction thereof.

EXAMPLE

For each insertion—The minimum fee is \$5.00 for each Warrant and \$2 for each quarter-inch after the Warrant.

Cheques should be made payable to THE TREASURER OF ONTARIO and forwarded to THE ONTARIO GAZETTE.

No exchange required on cheques.

Advertisements should be typewritten or printed legibly, separate from covering letter, number of insertions required must be stated and all signatures should be typed or printed.

All correspondence should be addressed in full "THE ONTARIO GAZETTE", Queen's Printer Office, 26 Broadalbane St., Toronto 5, Ontario. Telephone: 365-2238.

Rates of Advertising in The Ontario Gazette

REGULATION MADE UNDER THE OFFICIAL NOTICES PUBLICATION ACT

1.—(1) The rates payable for publication of matters in THE ONTARIO GAZETTE are,

- (a) on the first insertion, for a double-column insertion of,
 - (i) a notice of the sale of land for arrears of taxes, \$5, plus \$2 for each quarter-inch of columnar space or fraction thereof for a list of land liable to be sold for arrears of taxes, and
 - (ii) all other matter where the matter does not exceed one inch of columnar space, \$8, and where the matter exceeds one inch of columnar space, \$8 plus \$2 for each quarter-inch or fraction thereof of columnar space in excess of one inch;
 - (b) on each additional insertion of a matter referred to in clause *a*, one-half of the rate payable under subclause i or ii of clause *a*, as the case may be;
 - (c) on the first insertion, for a single-column insertion of all other matter,
 - (i) where the matter does not exceed one inch of columnar space, \$4, and
 - (ii) where the matter exceeds one inch of columnar space, \$4 plus \$1 for each quarter-inch or fraction thereof of columnar space in excess of one inch; and
 - (d) on each additional insertion of a matter referred to in clause *c*, one-half of the rate payable under subclause i or ii of clause *c*, as the case may be.
- (2) The rates in subsection 1 shall be paid as follows:

- 1. Upon submitting the copy of a matter for publication,
 - (a) \$5 for the first insertion of a matter referred to in subclause i of clause *a* of subsection 1;
 - (b) \$8 for the first insertion of a matter referred to in subclause ii of clause *a* of subsection 1; and
 - (c) \$4 for the first insertion of a matter referred to in clause *c* of subsection 1.
- 2. The balance upon receipt of an account from the Queen's Printer.

2.—(1) The rates payable for copies of THE ONTARIO GAZETTE are,

- (a) by subscribers for a subscription of 52 weekly issues, \$6; and
- (b) by others for a single copy, 15 cents.

(2) The rates in subsection 1 shall be paid in advance. O. Reg. 205/66.

3. Regulation 456 of Revised Regulations of Ontario, 1960 is revoked.

THE ONTARIO GAZETTE is published each Saturday and **advertisements must be received before Wednesday 4 p.m. to ensure publication in the next issue.**

Advertisements should be typewritten or printed legibly, **separate from covering letter.** Number of insertions required must be stated and the names of all signing officers typewritten or printed.

A copy of THE ONTARIO GAZETTE will be sent free to each advertiser for each week that his advertisement appears.

All remittances should be made payable to The Treasurer of Ontario and forwarded to THE ONTARIO GAZETTE.

All correspondence should be addressed:

THE ONTARIO GAZETTE, Queen's Printer Office,

26 Breadalbane St., Toronto 5, Ontario.

Telephone 365-2238

Authorized as Second Class Mail, Post Office Department, Ottawa.
